

Oracle BPEL Process Manager 10.1.2.0.x

Quick Start Tutorial

This document describes how BPEL and the Oracle BPEL Process Manager facilitate development of SOA applications through composing synchronous and asynchronous services into end-to-end, standard BPEL process flows. It is not intended to be a complete development guide, but rather a tutorial and guided tour providing a rapid overview of many of the most commonly used features. Pointers are given throughout to additional documentation and samples and readers should also use the many other documents available at <http://otn.oracle.com/bpel> after going through this guided tour.

Note: Much of this document is a tutorial with instructions for you to work hands-on with a local installation of the Oracle BPEL Process Manager. However, you can also just use this document to get some of the "test drive experience" even if you do not plan to install our server at this time.

This document has been tested with both the 10.1.2.0.0 and 10.1.2.0.2 releases of Oracle BPEL Process Manager.
