Metaphysics and Aesthetics of Decoration Michaela Fišerová, Jakub Mácha, 2026-01-23 This volume offers a fresh and timely contribution to current discussions of ornamentation repetition and

affect in aesthetics and philosophy It provides new insights into how ornamentation shapes artistic philosophical and social practices positioning it as a dynamic force in contemporary thought Through interdisciplinary essays by leading scholars the volume interrogates ornamentation's role in structuring metaphysics aesthetics and interspecies relations It challenges the traditional notion that ornament is mere decoration and reframes it as a vital philosophical and cultural concept Drawing on thinkers like Wittgenstein Heidegger Derrida Deleuze and Foucault the contributors explore how ornamentation operates as a parergon a site of affective repetition or a marker of epistemological shifts From critiques of Kantian hierarchies in craft to analyses of Baroque aesthetics and animal territoriality the chapters reveal ornamentation as both a boundary and a bridge simultaneously peripheral and essential to meaning making This volume offers new and unique perspectives on ornamentation's universal and culturally specific dimensions Metaphysics and Aesthetics of Decoration will appeal to scholars and advanced students interested in aesthetics metaphysics continental philosophy and art theory **Osiris,**

Volume 38 James Evans, Adrian Johns, 2023-07-18 Perceptively explores the shifting intersections between algorithmic systems and human practices in the modern era How have algorithmic systems and human practices developed in tandem since 1800 This volume of Osiris deftly addresses the question dispelling along the way the traditional notion of algorithmic code and human craft as natural opposites Instead algorithms and humans have always acted in concert depending on each other to advance new knowledge and produce social consequences By shining light on alternative computational imaginaries Beyond Craft and Code opens fresh space in which to understand algorithmic diversity its governance and even its conservation The volume contains essays by experts in fields extending from early modern arithmetic to contemporary robotics Traversing a range of cases and arguments that connect politics historical epistemology aesthetics and artificial intelligence the contributors collectively propose a novel vocabulary of concepts with which to think about how the history of science can contribute to understanding today's world Ultimately Beyond Craft and Code reconfigures the historiography of science and technology to suggest a new way to approach the questions posed by an algorithmic culture not only improving our understanding of algorithmic pasts and futures but also unlocking our ability to better govern our present **Secrets of**
