Concepts in Smart Societies Chaudhery Hussain, Antonella Petrillo, Shahid Ul Islam, 2023-12-15 We live in a society driven by rapid and unpredictable changes. The concept of the fourth industrial revolution was introduced less than ten years ago: the more aware and reality-oriented smart factories. By this we mean novelties in production technologies enabling IT services and greater attention to energy consumption. Today we are discussing the fifth stage in the evolution of society: the advent of the 5.0 company. This book outlines strategic lines and suggests future directions for the development of the super smart society which takes responsibility and ensures sustainability by adhering to new smart technologies and skills. The book is intended for a broad audience working in the fields of material science and engineering, energy, environment, etc. It is an invaluable reference source for researchers, academicians, students, industrial institutions, government, and independent institutes, individual research groups, and scientists working in the field of industrial applications of smart manufacturing design.

The Routledge International Handbook of Children, Adolescents, and Media Dafna Lemish, 2022-05-30 This second thoroughly updated edition of The Routledge International Handbook of Children, Adolescents, and Media analyzes a broad range of complementary areas of study, including children as media consumers, children as active participants in media making, and representations of children in the media. The roles that media play in the lives of children and adolescents, as well as their potential implications for their cognitive, emotional, social, and behavioral development, have attracted growing research attention in a variety of disciplines. This handbook presents a collection that spans a variety of disciplines, including developmental psychology, media studies, public health, education, feminist studies, and the sociology of childhood. Chapters provide a unique intellectual mapping of current knowledge, exploring the relationship between children and media in local, national, and global contexts. Divided into five parts, each with an introduction explaining the themes and topics covered, the Handbook features over 50 contributions from leading and upcoming academics from around the globe. The revised and new chapters consider vital questions by analyzing texts, audience, and institutions, including media and its effects on children's mental health, children and the internet of things, media and digital inequalities, news and citizenship in the aftermath of COVID-19. The Handbook's interdisciplinary approach and comprehensive current and international scope make it an authoritative state-of-the-art guide to the field of children's media studies. It will be indispensable for media scholars and professionals, policy makers, educators, and parents.
