**DATA BAR, COLOR SCALE & ICON SET FORMATS****Data Bars:**

Comparing two numbers in an Excel worksheet is easy, but it's difficult to compare multiple numbers with a quick glance.

- Data bar conditional formats:** Formatting that displays a color bar in the background of a cell so you can quickly compare the relative magnitude of values in a list.
- The length of the data bar represents the size of that cell's value in relation to the other cells to which you applied the conditional format.

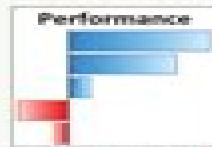

**Create a data bar conditional format:**

- Display the **Conditional Formatting** list.
- Point to **Data Bars**.
- Click the format you want to apply.

**Types of Data Bars:**

- Gradient Fill bar:**
  - Gradually changes from a solid fill at the left edge of the cell to white at the data bar goes across the cell.
  - Was introduced in Excel 2007.
- Solid Fill bar:**
  - Contains a solid color for the entire length of the data bar.
  - Was added to Excel 2010 after user feedback indicated Gradient Fill data bars were hard to interpret.

Year	Sales
2019	\$ 1,300,000
2020	\$ 2,900,000
2021	\$ 1,850,000

- Point to **Data Bars**.
- Click **More Rules**.
- Go to the **New Formatting Rule** dialog box.

- Go to the **Negative Value and Axis Settings** dialog box.
- Click the **Fill Color** button and select a fill color for negative values.

**OR**

- In the **Axis settings** section of the dialog box, select any of these options to position the axis separating positive and negative values:
  - Automatic** (display at variable position based on negative values)
  - Cell midpoint**
  - None** (show negative values in the same direction as positive)
- Click the **Axis color** button and select a color for the axis.
- Click **OK** twice to close the dialog boxes.

**Color Scales:**

Color scales use gradually changing colors, called gradients, to represent changes in cell values.

**EX:** A color scale that displays cells with small values in white and larger values in red would fill the background of the cell that contains the smallest value with a pure white background and add bits of red to represent larger values. The cell that contains the largest value in the range would have a background of pure red.

**Create a color scale conditional format:**

- Display the **Conditional Formatting** list.
- Point to **Color Scales**.
- Click the format you want to apply.

**NOTE:** You can select two-color or three-color Color Scales. If your data falls into three distinct ranges, use a two-color scale. If your data falls into three distinct ranges, such as poor, fair, and good performance, use a three-color scale.

Month	Station 1	Station 2	Station 3	Station 4
1	20	80	90	70
2	50	70	80	60
3	10	20	30	20

- Quick visual summaries are perfect for dashboards and worksheets that summarize an organization's operational data in relation to metrics established by the organization.
- Most dashboards use a variation of green, yellow, and red traffic lights to indicate good, fair, and poor performance.

**Create an icon set conditional format:**

- Display the **Conditional Formatting** list.
- Point to **Icon Sets**.

  - Click the **Icon's Type** list box's down arrow.
  - Select the operator to use in the comparison.
