The IFIP World Computer Congress WCC is one of the most important conferences in the area of computer science at the worldwide level and it has a federated structure which takes into account the rapidly growing and expanding interests in this area. Informatics is rapidly changing and becoming more and more connected to a number of human and social science disciplines. Human computer interaction is now a mature and still dynamically evolving part of this area which is represented in IFIP by the Technical Committee 13 on HCI. In this WCC edition it was interesting and useful to have again a Symposium on Human Computer Interaction in order to present and discuss a number of contributions in this field. There has been increasing awareness among designers of interactive systems of the importance of designing for usability but we are still far from having products that are really usable and usability can mean different things depending on the application domain. We are all aware that too many users of current technology often feel frustrated because computer systems are not compatible with their abilities and needs in existing work practices. As designers of tomorrow's technology we have the responsibility of creating computer artifacts that would permit better user experience with the various computing devices so that users may enjoy more satisfying experiences with information and communications technologies. *Microsoft Word 2007 Templates and Macros Quick Reference Guide (Cheat Sheet of Instructions, Tips and Shortcuts - Laminated Card)* Beezix, Inc
