Intro to Geometry (Angles & Angle Measures)

Give me a set of 10 new questions and you will be a pro!

1 2 3 4 5

1. There are 3 angles below. Name the angles (use all 3 names).

$\angle EDF$
 $\angle EDG$
 $\angle EFG$

$\angle FDE$
 $\angle GDE$
 $\angle FDG$

2. Classify the following angles.

Right Angle, Straight Angle, Acute Angle, Obtuse Angle

3. Given that $\angle BAC = 62^\circ$ and AD bisects $\angle BAC$, find $m\angle BAD$.

(Hint - bisect means to "split in half")

$$\angle BAD = \frac{\angle BAC}{2} = \frac{62^\circ}{2} = 31^\circ$$

31°

Reflection: I learned four types of angle classification. I also learned that bisect means to split in half (divide by 2).

Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25 The COVID 19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety As schools emptied remote learning rapidly expanded through online services and video chatrooms Unfortunately this disrupted many students and teachers who were not accustomed to remote classrooms This challenge has forced K 12 teachers to think differently about teaching Unexpectedly and with little time to prepare they have been confronted with redesigning their curriculum and instruction from face to face to online virtual classrooms to protect students from the COVID 19 virus while ensuring that these new online initiatives remain sustainable and useful in the post pandemic world As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction their instruction both in online and face to face will impact what and how students learn in the 21st century The Handbook of Research on Transforming Teachers Online Pedagogical Reasoning for Engaging K 12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K 12 virtual learning The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world The following chapters present instructional strategies for multiple grade levels and content areas best practices that work clearly describing why they work and the teachers pedagogical reasoning that supports online implementations The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face to face and virtual environments as an essential design component Covering such topics as K 12 classrooms pedagogical reasoning and virtual learning this text is perfect for professors teachers students educational designers and developers instructional technology faculty distance learning faculty and researchers interested in the subject
