N. Shuker,2015-09 The spectacular front cover painting by American artist Michael J Smith depicting 17 astonishing mystery beasts and other controversial entities was the inspiration for this latest book by leading cryptozoologist Dr Karl Shuker Ever since first seeing it in 2012 Shuker has wanted to prepare a book incorporating this painting s eclectic company of creatures but the fundamental problem that he faced was how to categorize them collectively What single term could be used that would

encompass this exceedingly diverse array of forms plus the many additional creatures also to be included in the book Cryptid was not sufficiently comprehensive nor was mystery creature or unknown animal because some of the depicted beasts seemingly exist beyond the perimeters and parameters of cryptozoology's traditional confines Eventually Shuker concluded that only one such term could satisfy all those requirements Indeed it was tailor made for this purpose The term What else could it be Monster Derived from the Latin noun monstrum and the Old French monstre monster has many different definitions a very strange frightening possibly evil ugly mythical creature something huge and or threatening a mutant or abnormal animal even something extraordinary astonishing incredible unnatural inexplicable These definitions collectively cover all of this book's subjects and so too therefore does the single word monster from which the definitions derive Consequently this book is a manifestation of monsters a unique exhibition a singular gathering an exceptional congregation of some of the strangest most mystifying and sometimes truly terrifying creatures ever reported **Monsters, Mutants and Madmen Vol 100 ,2009**
