Process Improvement in Practice Tore Dybå, Torgeir Dingsøyr, Nils Brede Moe, 2006-05-02 Faster better and cheaper are challenges that IT companies face every day. The customer's expectations shall be met in a world where constant change in environment organization and technology are the rule rather than the exception. A solution for meeting these challenges is to share knowledge and experience use the company's own experience and the experience of other companies. *Process Improvement in Practice* A Handbook for IT Companies tackles the problems involved in launching these solutions. *Process Improvement in Practice* A Handbook for IT Companies is designed for small IT companies who wish to start with systematic improvement. The methods and techniques in this handbook are tried in practice and have proven to be easy to use and scalable for local needs. Managers and developers will discover useful tips to initiate improvement work efficiently. This practical handbook is based on the authors improvement work in a range of companies since the mid nineties. *Process Improvement in Practice* A Handbook for IT Companies is designed for a professional audience composed of researchers and practitioners in industry. This book is also suitable for graduate level students in software process improvement and software engineering.

*Advanced Information Systems Engineering* Matthias Jarke, Andreas Oberweis, 2003-05-21 This book constitutes the refereed proceedings of the 11th International Conference on Advanced Information Systems Engineering (CAiSE '99) held in Heidelberg, Germany in June 1999. The 27 revised full papers presented together with 12 short research papers and two invited contributions were carefully selected from a total of 168 submissions. The papers are organized in topical sections on components, information systems management, method engineering, data warehouses, process modeling, CORBA and distributed information systems, workflow systems, heterogeneous databases and information systems dynamics.

Advances in Robotics Research: From Lab to Market Antoni Grau, Yannick Morel, Ana Puig-Pey, Francesca Cecchi, 2019-09-17 In this book Part I presents first an overview of the ECHORD project with its mission and vision together with a detailed structure of its functionalities and instruments. Experiments, Robotic Innovation Facilities and Public end user Driven Technology Innovation. PDTI Chapter 1 explains how the project is born, the partners, the different instruments and the new concept of cascade funding projects. This novelty made ECHORD a special project along the huge number of research groups and consortia involved in the whole project. So far it is the European funded project with more research team and partners involved in the robotic field. In Chapter 2 one of the instruments in ECHORD is explained in detail. RIFs Robotic innovation facilities are a set of laboratories across Europe funded with the project with the goal of hosting consortia involved in any experiment that have special needs when testing their robotic research. In the chapter the three different and specific RIFs will be described and analyzed. Chapter 3 explains an important instrument in ECHORD the Experiments. In this part a big number of research groups have been involved in short time funded research projects. The chapter explains the management of such Experiments from the call for participation, the candidate's selection, the monitoring, reviews and

funding for each of the 36 experiments funded for Echord Chapter 4 is very special because it presents the innovation of funding public end user driven technology in particular robotic technology The robotic challenge is the key of such an instruments together with the management of the different consortia that participated competitively in the success of the robotic challenge proposed by a public entity selected also with a very special and innovative process **Oracle VM Implementation and Administration Guide** Edward Whalen,2011-07-13 Master the Powerful Virtualization Tools in Oracle VM Set up and maintain a dynamic virtualization platform across your enterprise using the detailed information contained in this Oracle Press guide Oracle VM Implementation and Administration Guide contains key virtualization concepts practical instructions examples and best practices Find out how to design Oracle VM server farms build and deploy virtual machines handle provisioning and cloning and work with Oracle VM Manager Monitoring tuning and security techniques are also covered in this comprehensive volume Install configure and manage all Oracle VM components Plan size and set up Oracle VM server farms and server pools Control resources from Oracle Enterprise Manager Grid Control Oracle VM Manager and Oracle VM Command Line Interface Govern network drives and virtual storage using Oracle VM tools Create virtual machines manually or from Oracle library templates Convert existing virtual machines on other systems to Oracle VM virtual machines Generate virtual machine clones that run on multiple server pools Maintain guest operating systems and software using Oracle Enterprise Manager Grid Control's Oracle VM Management Pack **Advanced Micro-Device Engineering V** Sumio Hosaka,2015-05-11 Selected peer reviewed papers from the 5th International Conference on Advanced Micro Device Engineering 2013 AMDE 2013 December 19 2013 Kiryu Japan
