Capitalism in the Anthropocene John Bellamy Foster, 2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in

the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world's population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current planetary emergency exploring the theoretical historical and practical dimensions of the capitalism's alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope *A Joors Guide To... This Changes Everything* by Naomi Klein, 2015 You've probably heard warnings about climate change and maybe if you're like a lot of people you haven't taken them too seriously But climate change isn't a myth or a joke at all It's a deadly serious threat backed up by scientific fact that could destroy our way of life and our entire planet We've been warned for years about the effects of climate change and soon we might find ourselves paying dearly for our negligence This book contains shocking information about the negative effects our pollution is having around the world Social activist Naomi Klein turns a spotlight on the industries and politicians who not only refuse to fight the issue but sometimes even make things worse Filled with critical information you need to know *This Changes Everything* will open your eyes to the realities of the biggest threat this world faces today You will learn What kind of increasingly destructive effects fossil fuels are having on Earth's living creatures How politically conservative groups stop us from fighting climate change How corporate greed takes advantage of programs designed to fight climate change *We Had a Little Real Estate Problem* Kliph Nesteroff, 2021-02-16 A Best Book of 2021 by NPR and Esquire From Kliph Nesteroff the human encyclopedia of comedy VICE comes the important and underappreciated story of Native Americans and comedy It was one of the most reliable jokes in Charlie Hill's stand up routine My people are from Wisconsin We used to be from New York We had a little real estate problem In *We Had a Little Real Estate Problem* acclaimed comedy historian Kliph Nesteroff focuses on one of comedy's most significant and little known stories how despite having been denied representation in the entertainment industry Native Americans have influenced and advanced the art form The account begins in the late 1880s when Native Americans were forced to tour in wild west shows as an alternative to prison One modern comedian said it was as if a Guantanamo detainee suddenly had to appear on X Factor This is followed by a detailed look at the life and work of seminal figures such as Cherokee humorist Will Rogers and Hill who in the 1970s was the first Native American comedian to appear *The Tonight Show* Also profiled are several contemporary comedians including Jonny Roberts a social worker from the Red Lake Nation who drives five hours to the closest comedy club to pursue his stand up dreams Kiowa Apache comic Adrianne Chalepah who formed the touring group

The Humanity of Universal Crime Sinja Graf,2021-02-15

The international crime of crimes against humanity has become integral to contemporary political and legal discourse However the conceptual core of the term an act against all of mankind has a longer and deeper history in international political thought In an original excavation of this history The Humanity of Universal Crime examines theoretical mobilizations of the idea of universal crime in colonial and post colonial contexts Sinja Graf demonstrates the overlooked centrality of humanity and criminality to political liberalism s historical engagement with world politics thereby breaking with the exhaustively studied status of individual rights in liberal thought Graf argues that invocations of universal crime project humanity as a normatively integrated yet minimally inclusive and hierarchically structured subject Such visions of humanity have in turn underwritten justifications of foreign rule and outsider intervention based on claims to an injury universally suffered by all mankind Foregrounding the political productivity of universal crime the book traces the intellectual history of the rise fall and reappearance of notions of universal crime in political theory over time It looks particularly at the way European theorists have deployed the concept in assessing the legitimacy of colonial rule and foreign intervention in non European societies The book argues that an inclusionary Eurocentrism subtends the authorizing and coercive dimensions of universal crime Unlike much studied exclusionary Eurocentrist thinking inclusionary Eurocentrist arguments have historically extended an unequal repressive recognition via liability to non European peoples Overall the book offers a novel view of how claims to act in the name of humanity are deeply steeped in practices that reproduce structures of inequality at a global level particularly across political empires
