*Nation-building and citizenship* Reinhard Bendix, **Nation-building** American Political Science Association,1963  
*Nation-building* Karl Wolfgang Deutsch,1971 **Nation Building in Comparative Contexts** William Foltz,2017-07-17

What is and what makes a nation What forces work for and against the emergence of new nations What does the emergence of a nation mean to its people and what does it mean to international stability Nation Building in Comparative Contexts answers these questions Nine leading area specialists compare and analyze the long history of nationalism in Europe with its shorter histories in the Americas Asia and Africa The result is an outstanding contribution to understanding the problems confronting today s emerging nations one that remains of importance to the field The essays in this book provide the tools for comparison and analysis across continents and centuries The chapters dealing with Europe where the political and historical evidence is richest stress the broadest outlines of the nation making process The chapter on Asia concentrates on revolutionary war the two chapters on Africa where the creation or failure of nation states is a matter of the political situation of the moment raise the largest number of concrete problems Investigators have discovered that the making and breaking of nations is a process that must be studied in its general and uniform aspects especially if the unique features of each country and epoch are to be understood better The essays in this book are first steps in the comparison and analysis across the continents and centuries To some degree each combines concerns of the historian social scientist and of policy maker and statesman

**The Beginner's Guide to Nation-Building** James Dobbins,Seth G. Jones,Keith Crane,Beth Cole DeGrasse,2007-02-08 Since the end of the Cold War the United States NATO the United Nations and a range of other states and nongovernmental organizations have become increasingly involved in nation building operations Nation building involves the use of armed force as part of a broader effort to promote political and economic reforms with the objective of transforming a society emerging from conflict into one at peace with itself and its neighbors This guidebook is a practical how to manual on the conduct of effective nation building It is organized around the constituent elements that make up any nation building mission military police rule of law humanitarian relief governance economic stabilization democratization and development The chapters describe how each of these components should be organized and employed how much of each is likely to be needed and the likely cost The lessons are drawn principally from 16 U S and UN led nation building operations since World War II and from a forthcoming study on European led missions In short this guidebook presents a comprehensive history of best practices in nation building and serves as an indispensable reference for the preplanning of future interventions and for contingency planning on the ground

**America's Role in Nation-Building** James Dobbins,Ian O. Lesser,Peter Chalk,2003-08-01 The post World War II occupations of Germany and Japan set standards for postconflict nation building that have not since been matched Only in recent years has the United States has felt the need to participate in similar transformations but it is now facing one of the most challenging prospects since the 1940s Iraq The authors review

seven case studies Germany Japan Somalia Haiti Bosnia Kosovo and Afghanistan and seek lessons about what worked well and what did not Then they examine the Iraq situation in light of these lessons Success in Iraq will require an extensive commitment of financial military and political resources for a long time The United States cannot afford to contemplate early exit strategies and cannot afford to leave the job half completed

### **Nation Building in Comparative Contexts**

Karl Wolfgang Deutsch, William J. Foltz, Originally published New York Atherton 1966

**Nation-building** Cynthia Ann Watson,

Nation-building Michael Logan, 2007 This book is a collection of articles in which authors present diverse viewpoints on the justification of nation building and on the success of nation building in Iraq and Afghanistan with their dissimilar ethnic populations and cultures

### **Nation-Building as Necessary Effort in Fragile States**

René Grotenhuis, 2025-10-01 Policies intended to bring stability to fragile states tend to focus almost exclusively on building institutions and systems to get governance right Simply building the state is often seen as sufficient for making it stable and legitimate But policies like these Ren Grotenhuis shows in this book ignore the question of what makes people belong to a nation state arguing that issues of identity culture and religion are crucial to creating the sense of belonging and social cohesion that a stable nation state requires

### **Dynamics of Nation Building**

Benard Etta, 2005 **Nation Building** Andreas Wimmer, 2018-05-01 A new and comprehensive look at the reasons behind successful or failed nation building Nation Building presents bold new answers to an age old question Why is national integration achieved in some diverse countries while others are destabilized by political inequality between ethnic groups contentious politics or even separatism and ethnic war Traversing centuries and continents from early nineteenth century Europe and Asia to Africa from the turn of the twenty first century to today

Andreas Wimmer delves into the slow moving forces that encourage political alliances to stretch across ethnic divides and build national unity Using datasets that cover the entire world and three pairs of case studies Wimmer s theory of nation building focuses on slow moving generational processes the spread of civil society organizations linguistic assimilation and the states capacity to provide public goods Wimmer contrasts Switzerland and Belgium to demonstrate how the early development of voluntary organizations enhanced nation building he examines Botswana and Somalia to illustrate how providing public goods can bring diverse political constituencies together and he shows that the differences between China and Russia indicate how a shared linguistic space may help build political alliances across ethnic boundaries Wimmer then reveals based on the statistical analysis of large scale datasets that these mechanisms are at work around the world and explain nation building better than competing arguments such as democratic governance or colonial legacies He also shows that when political alliances crosscut ethnic divides and when most ethnic communities are represented at the highest levels of government the general populace will identify with the nation and its symbols further deepening national political integration Offering a long term historical perspective and global outlook Nation Building sheds important new light on the challenges of political integration in diverse countries

**Models of Nation Building** J. K. Pulparamil, 1975

**Strategies of Symbolic Nation-building in South Eastern Europe** Pål Kolstø, 2016-04-01 After the conflagration of Tito's Yugoslavia a medley of new and not so new states rose from the ashes. Some of the Yugoslav successor states have joined or are about to enter the European Union while others are still struggling to define their national borders symbols and relationships with neighbouring states. Strategies of Symbolic Nation building in South Eastern Europe expands upon the existing body of nationalism studies and explores how successful these nation building strategies have been in the last two decades. Relying on new quantitative research results the contributors offer interdisciplinary analyses of symbolic nation building in Albania, Bosnia Herzegovina, Croatia, Kosovo, Macedonia, Montenegro and Serbia to show that whereas the citizens of some states have reached a consensus about the nation building project other states remain fragmented and uncertain of when the process will end. A must read not only for scholars of the region but policy makers and others interested in understanding the complex interplay of history, symbolic politics and post conflict transition.

**National Building and Loan Herald**, 1899 *Nation-Building and Community in Israel* Dorothy Willner, 2015-12-08 The author approaches the intricate process of nation building in Israel through an examination of transformations which took place within a major development sector rural land settlement during Israel's first decade of statehood. Based on four years of observation in Israel the study analyzes the ways in which this state worked out the urgent problems that confront a new nation and demonstrates in vivid ethnographic detail how the policies thus formed made themselves felt in particular communities. The result is a clear picture of the interaction of national planning and the realities of village life in post statehood Israel and an original contribution to the anthropology of complex societies. *The Hazards of Nation Building* John Gai Yoh, 2018-04-07 The Sudan state have been in crisis for too long and rarely did any of the numerous political organizations in the country take the risk and the burden to debate, fight and negotiate for the transformation of the country from a decadent military coup prone underdeveloped state to a viable democratic country and from a religious fanatic and racist state to a multi cultural and multi religious tolerant state. Since independence only the Sudan People's Liberation Movement Army SPLM A dared to challenge all the shades of Sudanese political spectrum to transform the country into a viable economic and political democratic and secular country where citizenship is the criteria for belonging to a nation.
