Fostering Transformative Research in the Geographical

Sciences National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Geographical Sciences Committee, Committee on Identifying Transformative Research in the Geographical Sciences, 2019-04-22 The central purpose of all research is to create new knowledge In the geographical sciences this is driven by a desire to create new knowledge about the relations between space place and the anthropogenic and non anthropogenic features and processes of the Earth But some research goes beyond these modest aims and creates new opportunities for further research or affects the process of knowledge acquisition more broadly or changes the way other researchers in a domain think about the world and go about their business Due to its positive impacts transformative research can be regarded as inherently having greater value than more conventional research and funding agencies clearly regard transformative research as something to be encouraged and funded through special programs Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted communicated and its influence on the discipline has become clear Fostering Transformative Research in the Geographical Sciences reviews how transformative research has emerged in the past what its early markers were and makes recommendations for how it can be nurtured in the future

21st Century Geography Joseph P. Stoltman, 2012 This is a theoretical and practical guide on how to undertake and navigate advanced research in the arts humanities and social sciences

Political Geography Colin Flint, Peter J. Taylor, 2025-04-04 The new and updated eighth edition of Political Geography once again shows itself fit to tackle a frequently and rapidly changing geopolitical landscape It retains the intellectual clarity rigour and vision of previous editions based upon its world systems approach and is complemented by the perspective of feminist geography The book successfully integrates the complexity of individuals with the complexity of the world economy by merging the compatible but different research agendas of the co authors This edition explores political geography within the context of US China competition Russia's war with Ukraine global climate change new technologies and challenges to democracy It advances the discussion from the previous editions on the dynamics of the capitalist world economy and the constant tension between the global scale of economic processes and the territorialization of politics in the current context of geopolitical change The chapters have been updated with new examples new sections on global climate change populism and the growing threat of global war The book offers a framework to help students make their own judgements of how we got

where we are today and what may or should be done about it Political Geography remains a core text for students of political geography geopolitics international relations and political science as well as more broadly across human geography and the social sciences **The Routledge Handbook of Mobilities** Peter Adey,David Bissell,Kevin Hannam,Peter Merriman,Mimi Sheller,2014-01-10

The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study *Managing Adaptation to Climate Risk* Geoff O'Brien,Phil O'Keefe,2013-07-24 Resilience has become the new buzz word in Government Health Energy and Disaster Management sectors Climate change is the single largest threat to sustainable development and addressing climate risk is a challenge for all This book calls for greater collaboration between climate communities and disaster development communities to tackle the challenges faced in addressing climate risk reduction It evaluates approaches used by each community to reduce the adverse effects of climate change and argues that adaptation focused on peoples livelihoods rather than technology is the best way to reduce risk One area that offers some promise for bringing together these communities is through the concept of resilience a process that embeds capacity to respond to and cope with disruptive events The book explores various models of resilience and concludes by evaluating the scope for a holistic approach where these communities can build communities resilient to climate driven

risks Managing Adaptation to Climate Risk provides a conceptual framework for future debate and will be of interest to students and researchers in Development Studies Environmental Studies and Disaster Risk Reduction *Environment & Planning*, 2012 The Global Challenge and Marginalization Márcio Moraes Valença, 2008 Marginality is often seen as a reflection of division in which there is an unequal relationship of economic and political power between two extremes In this way it is a common thing to find oppositional couples like North South Rich Poor Homogenous Heterogenous Centre Periphery Inclusion Exclusion Developed Underdeveloped and New Old in much of the literature dealing with marginality These oppositions come about out of a socially and politically unbalanced society which is organised according to the differentiation of individuals in a hierarchical exclusionary fashion In this book there are 25 chapters written by 36 academics from 27 universities located in 14 countries and in 4 continents on this fascinating subject matter *The Library as Place* John E. Buschman, Gloria J. Leckie, 2007 Libraries as a component of cultural space are ubiquitous to almost every society during almost every time period However as places of cultural and symbolic and intellectual meaning they have varied greatly To capture both aspects this collection of 14 original papers covers library spaces old and new real and imagined large and small public and private Contributions range from a consideration of the Garrison library in the British Empire to the Carnegie library as a social institution to the imagined library in Buffy the Vampire Slayer The result is a fascinating look at the library as a physical social and intellectual place within the hearts and minds of its clientele and the public at large Tourism Recreation Research, 2005 *Tourism Development Revisited* Sutheeshna S Babu, Sitikanta Mishra, Bivraj Bhushan Parida, 2008-07-11 The global tourism industry is a growing dynamic mega industry despite the temporary setbacks it has faced from time to time due to political and natural elements This book approaches tourism development through a critical prism The collection of articles by leading experts in international tourism relooks at the complex phenomenon of tourism development within a multi disciplinary framework Replete with interesting case studies and tourism statistics it re examines and re interprets prevailing dominant paradigms in the subject leading to new insights and perspectives Tourism Development Revisited Concepts Issues and Paradigms in addition to discussing the concepts scope and nature of the tourism business also includes a diverse commentary on The development of tourism in the 21st century Emerging models in international tourism Challenges faced in emerging markets of East Europe India and China Impact of the Internet and online markets on the travel industry Changing human resource practices and contributions by the informal sector The importance of tourism as a source of economic development The dynamics of the global tourist and corporate traveler Ecotourism exotic destinations and experiential tourism and Fundamental issues in leisure recreation and tourism The contributors of all the 22 chapters have explored their respective topics beyond the expected realms They deal with the conceptual and paradigmatic evolution of tourism as a socio economic phenomenon and an industry contradictions in its development process tourism in the developing world including the fast growing Chinese and Indian economies new

tourism products and their development and management The book will hold tremendous appeal for students researchers academicians policy makers and professionals in this field **Environment and Planning** ,2007 **Babylon and Golden City** Susanne Cuevas,2008 **The Globalization of Retailing** Neil M. Coe,Neil Wrigley,2009 This path breaking collection brings together seminal contributions from the burgeoning multidisciplinary literature on the globalisation of retailing **Berichte zur deutschen Landeskunde** ,2006 *White Identities* Simon Clarke,Steve Garner,2010-02-15 The study of white ethnicities is becoming increasingly important in the social sciences This book provides a critical introduction to the topic Whiteness has traditionally been seen as ethnically transparent the marker against which other ethnicities are measured This analysis is clearly incorrect but only recently have many race and ethnicity scholars moved away from focusing on ethnic minorities and instead oriented their studies around the construction of white identities Simon Clarke and Steve Garner s book is designed to guide students as they explore how white identities are forged using both sociological and psycho social ideas Including an excellent survey of the existing literature and original research from the UK this book will be an invaluable guide for sociology students taking modules in race and ethnicity
