complexities of narrative inquiry with indigenous and cross cultural participants in addition to child participants *What is Narrative Research?* Corinne Squire, Molly Andrews, Mark Davis, Cigdem Esin, Barbara Harrison, Lars-Christer Hyden, Margareta Hydén, 2014-11-20

Narrative research has become a catchword in the social sciences today promising new fields of inquiry and creative solutions to persistent problems. This book brings together ideas about narrative from a variety of contexts across the social sciences and synthesizes understandings of the field. Rather than focusing on theory it examines how narrative research is conducted and applied. It operates as a practical introductory guide basic enough for first time researchers but also as a window onto the more complex questions and difficulties that all researchers in this area face. The authors guide readers through current debates about how to obtain and analyse narrative data about the nature of narrative, the place of the researcher, the limits of researcher interpretations and the significance of narrative work in applied and in broader political contexts *Using Narrative Inquiry as a Research Method* Leonard Webster, Patricie Mertova, 2007-08-07

This book provides a much needed up to date introduction to the topic of narrative inquiry which has seen a growing interest in recent years. Narrative inquiry provides researchers with a framework through which they can investigate the ways humans experience the world depicted through their stories. The book looks at how this method can effectively be applied as a means of research in a range of contexts including flexible open and distance or workplace learning. It demonstrates the value and utility of employing narrative as a research tool in a range of teaching and learning settings and includes chapters on background methodology and case studies to illustrate the application of narrative inquiry as a research method.

Contextualising Narrative Inquiry Sheila Trahar, 2013-04-02

Narrative inquiry is growing in popularity as a research methodology in the social sciences, medicine and the humanities. In narrative inquiry the transparency of interactions between researcher and research participants together with rich contextual descriptions help to shape and structure research texts rendering them engaging and readable. *Contextualising Narrative Inquiry* argues that all researchers should foreground the importance of the context in which research takes place and develop methodological approaches that are grounded in their local contexts. To do so they need to pay attention to how knowledge is constructed, shared and understood in those contexts. This is particularly important when contexts have been subjugated historically through colonialism and when local indigenous ways of knowing have been ignored or dismissed. The contributors to this edited collection have all used narrative inquiry for a range of topics and in a range of contexts including Leadership styles of Asian women, The Deaf community in the UK, Voluntary celibacy in Malta, Administrators in Ghanaian higher education, Multiculturalism in primary education in Cyprus, Teacher identities in Hong Kong, The reflective practitioner in higher education in Malaysia. The diversity of the topics illuminates the potential for narrative inquiry to be used to investigate a broad range of issues in many contexts by people with a wide range of backgrounds. A common thread throughout is a reflexive discussion of how each contributor used narrative inquiry as a methodological approach highlighting not only its affordances but also the complexities of using it.
