NAS 2 – UNIT 1 STUDY GUIDE

1. The Scientific Method is an **OBJECTIVE** approach to answering **QUESTIONS** in science.

   2. What are the three primary components of the Scientific Method?
   OBSERVATION (visual examination of the surroundings)
   EXPERIMENTATION (testing hypotheses)
   ANALYSIS (examining data)

3. A **hypothesis** is a proposed **EXPLANATION** for a **PHENOMENON** and is typically stated in an "**IF/THEN**" statement.

   4. A **theory** is a substantiated explanation, based on **WELL-SUPPORTED HYPOTHESES** from several **INDEPENDENT LINES OF RESEARCH**; theories often change as more **DATA** becomes available.

   5. The Scientific Method is limited in that it can only be applied in situations where **CONCRETE DATA, BASED ON OBSERVATIONS OF THE MEASURABLE UNIVERSE** can be collected (**SCIENTIFICALLY TESTABLE** situations). It usually doesn't prove a hypothesis to be **TRUE**, but can either **SUPPORT** or **FALSIFY** a hypothesis..

6. List the seven steps, in order, of the Scientific Method.

   Step 1: **MAKE AN OBSERVATION**
   What is happening of interest to you and your field?

   Step 2: **ASK A QUESTION**
   What might be the reason(s) for what you've observed?

   Step 3: **RESEARCH CURRENT LITERATURE**
   Gather data on what is already known; what related experiments have already been conducted?

   Step 4: **FORMULATE A HYPOTHESIS**
   Based on your observations and research, predict an explanation of the outcome.

   Step 5: **TEST THE HYPOTHESIS**
   Set up experiments to determine if the predicted outcome actually occurs.

   Step 6: **MEASURE, RECORD, AND ANALYZE RESULTS**
   Arrange data into appropriate groups; graphing provides a visual display of results.

   Does the data support or refute the hypothesis?
