Overview Of Hepatitis C Virus:

The Hepatitis C Viruses C.H. Hagedorn, C.M. Rice, 2012-12-06 Chronic hepatitis C is a major worldwide health problem affecting more than 170 million people. Chronic infections lead to cirrhosis and liver failure or hepatocellular cancer in many instances. This volume includes comprehensive reviews that cover much of the vast literature that has appeared since the identification of the hepatitis C virus RNA genome. It will be an invaluable collection for anyone wanting an up to date picture of HCV transmission, molecular virology, immune response, cellular molecular pathogenesis and possible avenues for developing effective new therapeutics and vaccines.

Hepatitis C Virus-Host Interactions and Therapeutics: Current Insights and Future Perspectives Imran Shahid, Qaiser Jabeen, 2023-01-24 The burden of hepatitis C virus (HCV) infection on the public health care system continues to remain significant despite the remarkable progress made in HCV therapeutics in the recent past. There are now almost a dozen oral interferon free direct acting antivirals available for the treatment of hepatitis C virus infection. Despite advances in the treatment of HCV, therapeutic gaps remain that are yet to be fully explored. Researchers and scientists still strive to understand virus host interactions to map the disease's progression along with extrahepatic manifestations and virus invasion strategies impacting the host's immune system. This book briefly discusses the biology of HCV infection, virus host interactions, molecular epidemiology of the infection and the full spectrum of immune responses to hepatitis C. It also provides in depth information about HCV clinical diagnostics and therapeutic knowledge to all stakeholders involved in HCV screening, diagnosis, treatment and management. Topics covered in the chapters include: 1. HCV host interactions leading to asymptomatic acute infection; 2. the progression of acute HCV infection to chronic disease and subsequent extrahepatic comorbidities; 3. Innate and adaptive immune responses in HCV infections; 4. Consensus based Approaches for Hepatitis C Screening and Diagnosis; 5. advances in hepatitis C therapy and global management of HCV; and 6. the outcomes of Oral Interferon free Direct acting Antivirals as Combination Therapies to Cure Hepatitis C. This book is a valuable addition to undergraduate and postgraduate hepatology students and physicians, clinicians, hepatologists and health care officials involved in HCV clinical diagnosis and therapeutics.

Hepatitis C Virus: The Next Epidemic, An issue of Gastroenterology Clinics of North America K. Rajender Reddy, 2016-01-07 There are over 180 million people with chronic HCV infection worldwide with between 2.7 and 3.9 million in the United States. Hepatitis C most significantly affects Asia and Africa with rates up to 15% in countries such as Egypt and up to 30% in certain regions such as Punjab, Pakistan. Hepatitis C places a significant burden on the public health infrastructure as it remains the leading cause of chronic liver disease, accounting for 50-75% of primary liver cancers and is responsible for 30% of all liver transplantations. It is estimated to have cost the United States \$5.5 billion in 1997, comparable to the national cost of asthma \$5.8 billion in 1994. This number is only expected to grow as the current HCV population ages, increasing overall rates of compensated cirrhosis, end stage liver disease. The evolution of directly acting anti-virals has ushered in a new era for chronic hepatitis C. Ongoing drug

development strategy has involved targeting several replication steps of the virus and the hope is to see all oral therapies by late 2014 or early 2015 Thus we are at an exciting cross roads with regard to new information and challenges with HCV rising disease burden with associated high costs the challenges globally and in multiple patient populations and the impending availability of effective and well tolerated treatments Therefore there is a need to commission an exclusive issue of GCNA for HCV Current Progress and Challenges in the Development of a Hepatitis C Virus Vaccine Steven K.H.
