Book Communications Interference Networks Communication Technology:

Communications in Interference Limited Networks Wolfgang Utschick, 2016-02-04 This book offers means to handle interference as a central problem of operating wireless networks. It investigates centralized and decentralized methods to avoid and handle interference as well as approaches that resolve interference constructively. The latter type of approach tries to solve the joint detection and estimation problem of several data streams that share a common medium. In fact an exciting insight into the operation of networks is that it may be beneficial in terms of an overall throughput to actively create and manage interference. Thus when handled properly mixing of data in networks becomes a useful tool of operation rather than the nuisance as which it has been treated traditionally. With the development of mobile, robust, ubiquitous, reliable and instantaneous communication being a driving and enabling factor of an information centric economy the understanding, mitigation and exploitation of interference in networks must be seen as a centrally important task.

Spectrum Sharing in Cognitive Radio Networks

Shweta Pandit, Ghanshyam Singh, 2017-04-12 This book discusses the use of the spectrum sharing techniques in cognitive radio technology in order to address the problem of spectrum scarcity for future wireless communications. The authors describe a cognitive radio medium access control (MAC) protocol with which throughput maximization has been achieved. The discussion also includes use of this MAC protocol for imperfect sensing scenarios and its effect on the performance of cognitive radio systems. The authors also discuss how energy efficiency has been maximized in this system by applying a simple algorithm for optimizing the transmit power of the cognitive user. The study about the channel fading in the cognitive user and licensed user and power adaption policy in this scenario under peak transmit power and interference power constraint is also present in this book.

Spectrum Sharing in Cognitive Radio Networks

Prabhat Thakur, Ghanshyam Singh, 2021-06-22 **SPECTRUM SHARING IN COGNITIVE RADIO NETWORKS** Discover the latest advances in spectrum sharing in wireless networks from two internationally recognized experts in the field. *Spectrum Sharing in Cognitive Radio Networks: Towards Highly Connected Environments* delivers an in-depth and insightful examination of hybrid spectrum access techniques with advanced frame structures designed for efficient spectrum utilization. The accomplished authors present the energy and spectrum efficient frameworks used in high demand distributed architectures by relying on the self scheduled medium access control (SMC) MAC protocol in cognitive radio networks. The book begins with an exploration of the fundamentals of recent advances in spectrum sharing techniques before moving onto advanced frame structures with spectrum accessing approaches and the role of spectrum prediction and spectrum monitoring to eliminate interference. The authors also cover spectrum mobility, interference and spectrum management for connected environments in substantial detail. *Spectrum Sharing in Cognitive Radio Networks: Towards Highly Connected Environments* offers readers a recent and rational theoretical mathematical model of spectrum sharing strategies that can be used for practical simulation of future generation wireless communication technologies. It also highlights ongoing trends revealing fresh research.
