Canada's Video Revolution Peter Lyman, Canadian Institute for Economic Policy, 1983 From the back cover While Canadians have been leaders in many aspects of communications technology the content has been mainly foreign So too have the applications of new technology typically been property of alliances of corporations in the U S Europe and Japan As the pace of the globalization of culture quickens Canada s broadcasting recording film and publishing industries will face formidable challenges Communications analyst Peter Lyman describes the impact of the new technologies on Canadian cultural industries and proposes strategies he feels must be accepted to make these industries viable in an ever changing marketplace

Understanding Power Electronics via Simulations S. Raghuram Naidu, 2025-08-05 This book introduces Power Electronics by emphasizing computer simulation using the Python programming language It is primarily a senior undergraduate text but can also be used for a post graduate course on DC DC switch power mode converters It is also a reference for practicing engineers Theoretical analysis of the circuits and approximate calculations precede the simulations and the reader is taken by hand through the numerical analysis Finally when the programs are presented they are simple and easy to understand Python is a computational language that is easy to learn and has the libraries necessary for simulations The author has observed that students interest in Power Electronics is enhanced when they learn to simulate the circuits without depending on a general purpose program This book encourages the reader to run the programs and perform numerical experiments Quite a few simulations in the later chapters have been left as exercises for the reader Many feedback control issues have been extensively discussed in the chapter on non isolated DC DC converters
