Nationalist Myths and Ethnic Identities, 1999-01-01 This timely study examines the processes by which modern states are created within multiethnic societies. How are national identities forged from countries made up of peoples with different and often conflicting cultures, languages, and histories? How successful is this process? What is lost and gained from the emergence of national identities? Natividad Gutiérrez examines the development of the modern Mexican state to address these difficult questions. She describes how Mexican national identity has been and is being created and evaluates the effectiveness of that process of state building. Her investigation is distinguished by a critical consideration of cross-cultural theories of nationalism and the illuminating use of a broad range of data from Mexican culture and history, including interviews with contemporary indigenous intellectuals and students, an analysis of public school textbooks and

information gathered from indigenous organizations Gutiérrez argues that the modern Mexican state is buttressed by pervasive nationalist myths of foundation descent and heroism. These myths expressed and reinforced through the manipulation of symbols in public education and political discourse downplay separate ethnic identities and work together to articulate an overriding nationalist ideology. The ideology girding the Mexican state has not been entirely successful, however. This study reveals that indigenous intellectuals and students are troubled by the relationship between their nationalist and ethnic identities and are increasingly questioning official policies of integration.

Accelerated Language Learning (ALL) with The Lit Six

Nancy Akhavan, 2023-07-14 It's a new day. We've learned language acquisition in school isn't linear and rote but rather dynamic, meaningful, and collaborative. Multilingual learners thrive through the production of oral and written language. Dr. Nancy Akhavan. Are you ready to teach multilingual learners with instruction that reflects current English Language Development ELD standards? Language acquisition expert Dr. Nancy Akhavan provides a flexible resource that delivers what students need most: experiences that teach language skills through intellectually engaging texts, tasks, and lively communication with peers. This dynamic curriculum offers five units based on a writing performance task that aligns to commonly taught genres and key reading skills. The research-backed instructional framework maximizes students' participation through a series of listening, speaking, and writing activities. Book Review 1: Nancy Akhavan has brought together a set of carefully designed lessons that address the specific language acquisition needs of English Language Learners. Each 30-minute lesson is designed to help multilingual learners acquire English through content which supports lesson planning and delivery. Dr. Akhavan's work ensures success by demystifying the process of teaching and learning. Cinnamon Scheufele, Executive Director, Curriculum and Instruction, Lindsay Unified School District, Lindsay, CA. Book Review 2: As a teacher educator, this curriculum is exactly what I wished I had to give my early career teachers who needed structure, scaffolding, and support in fine-tuning their instruction. The unit design with the foundations pave the way, lead the way, and assess serve as the foundation upon which each lesson rests. The lessons are laser-focused to standards and learning outcomes, and the assessment perfectly aligns. I enthusiastically support this curriculum which has the potential to promote significant changes in the literacy trajectories for students and districts. Localization and Quality Assessment of Project-Based Learning in China Xuemei Xia, 2025-09-17 This book provides a systematic assessment of the quality of Project-Based Learning (PBL) and proposes a diagnostic criteria framework for evaluating project design and implementation. It identifies key characteristics that vary as a result of differentiation. The book offers a feasible framework for implementing competency-based teaching on an international scale, drawing from our long-term exploration in China to address shortcomings in Chinese education. Furthermore, it delineates the boundaries and limitations of project-based design, facilitating professional learning in its implementation. Educational practitioners will gain multidimensional perspectives to develop their capacities and critically reflect on PBL's impact on students' learning.
