What foods should you eat on intermittent fasting? What are the best things to make this diet work? There are some foods which work better and others which don't. To determine what's best for you to eat is really based on the dietary needs that you have and how much you normally eat. Intermittent fasting is fasting for a certain period of time and then eating for a certain period of time, much shorter than the former and usually involves all of your meals at once during then what's good for you to eat though. Eating right while intermittent fasting is very important because otherwise you'll run into the problem of feeling hungry and unhappy. You also can run into nutritional deficiency and it is something that you should definitely consider. So what are you waiting for? Here are 12 amazing foods that you can eat and things which allow for you to improve on different parts of life and make it worth your while. **Intermittent Fasting** Charlie Mason, 2020-11-21. If you need to lose weight, look great, reduce inflammation, boost your immunity or a myriad of other benefits then you should consider one of the various intermittent fasting methods. There are different forms of intermittent fasting so if you want to fast responsibly then you should find the type of fasting that suits you best. For instance, there is the 16/8 fasting where you fast for 16 hours and then eat your meals within the remaining 8 hours. Then there is the alternate day fast where you fast on one day and eat normally the next. You may also choose the extended fast where you fast for a longer period of time such as 8 days or more. Traditional fasting has proven to be ineffective with many people unable to cope with the tough requirements. Ordinarily, people would fast from dawn to dusk for probably an entire month, having to endure days on end without proper meals. Then once the benefits of fasting are achieved, they would resume normal life only for the problems to creep back again. This can be very frustrating. Fortunately, intermittent fasting solves this challenge. Rather than go through lengthy periods of fasting, all you need to do is identify the most suitable intermittent type of fasting. For instance, you may choose the 16/8 format where you go for 16 hours without eating anything and only eat within an 8-hour window in any given day. Fortunately, the 16 hours of fasting include your sleeping time so you will be asleep for about half of that time. Intermittent fasting has gained popularity because it offers choice, is easy to handle, and has a lot of benefits but without the rigors and disadvantages of traditional ways of fasting. If you need to lose weight, look great, reduce inflammation, boost your immunity or a myriad of other benefits then you should consider one of the various intermittent fasting methods.
