

How Migration and Poverty relate to each other?

01

This relationship is bidirectional.

Poverty can reduce or prevent migration

Migration can reduce or prevent poverty

Let's understand this better

Migration can be a way out of poverty

Migration can serve as a way out of poverty when people move in search of better social and economic opportunities

Some migration causes or deepens poverty

Forced migration or migration on adverse terms, such as bonded labour, could be a route to extreme poverty.

Poverty inhibits international migration

People living in extreme poverty are more likely to migrate within their countries of origin or to other low-and-middle income countries (LMICs) where prospects of poverty reduction may be lower.

Poverty can prevent migration

Migration requires financial, social, and human capital resources. People experiencing poverty may aspire to move but lack the capacity to do so.

02

Busting the myths

MYTH 1

Only people experiencing poverty or adversity migrate

In 2020

2/3 of international migrants were migrant workers

Only

3.6%

are from low-income countries

This figure reveals that a big portion of people moving for work are from middle- or high-income countries.

MYTH 2

Europe and North America are destinations for most refugees

In 2020

3.4 m

refugees migrated to the Islamic Republic of Iran and Turkey each, largest populations worldwide.

Germany, France, and the UK

Germany was third with 2.8 million, followed by Colombia with slightly less than 2.8 million.

Pakistan hosted 2.3 million refugees.

MYTH 3

Refugees make up the largest number of migrants

In 2020

59.1 m

people had migrated internally within their own countries.

There were an estimated

27.1 m

refugees globally making them the smallest share of international migrants.

MYTH 4

Intra-region migration is minimal

In 2020

Around

1/3 of all international migrants

moved within their region of origin, with Southern Africa having the largest share of intra-regional migration.

Europe

63%

of all cross-border migration is from other European countries.

03

Knowledge Gap

Lack of high-quality data in this area of extreme poverty research.

Focus is often on international migration when international migration is likely for greater and strongly linked to poverty.

Lack of focus on intra-region migration (from one LMIC country to another).

Challenges faced in estimating trends in migration due to competing definitions of who counts as a migrant, and underreporting of irregular migration.

Focus on research that could narrow these knowledge gaps will help make better policy decisions around poverty and migration.

Migration And Poverty Migration And Poverty:

Migration and Poverty Edmundo Murrugarra, Jennica Larrison, Marcin Sasin, 2010-11-24 This volume uses recent research from the World Bank to document and analyze the bidirectional relationship between poverty and migration in developing countries The case studies chapters compiled in this book from Tanzania Nepal Albania and Nicaragua as well as the last policy oriented chapter illustrate the diversity of migration experience and tackle the complicated nexus between migration and poverty reduction Two main messages emerge Although evidence indicates that migration reduces poverty it also shows that migration opportunities of the poor differ from that of the rest In general the evidence suggests that the poor either migrate less or migrate to low return destinations As a consequence many developing countries are not maximizing the poverty reducing potential of migration The main reason behind this outcome is difficulties in access to remunerative migration opportunities and the high costs associated with migrating It is shown for example that reducing migration costs makes migration more pro poor The volume shows that developing countries governments are not without means to improve this situation Several of the country examples offer a few policy recommendations towards this end

Poverty, Gender and Migration Sadhna Arya, Anupama Roy, 2006-03-09 This volume studies the patterns of migration among Asian women focusing particularly on poverty and the attendant issues of powerlessness that mediate women's experiences of migration

The contributors engage with perspectives that give a determining role to economic structures and reduce migration to a passive response and closely examine the complex layers of needs networks and choices that are available in poverty driven migration

Migration, Remittances, Poverty, and Human Capital Marcin J. Sasin, David McKenzie, 2007 This paper reviews common challenges faced by researchers interested in measuring the impact of migration and remittances on income poverty inequality and human capital or in general welfare as well as difficulties confronting development practitioners in converting this research into policy advice On the analytical side the paper discusses the proper formulation of a research question the choice of the analytical tools as well as the interpretation of the results in the presence of pervasive endogeneity in all decisions surrounding migration Particular attention is given to the use of instrumental variables in migration research On the policy side the paper argues that the private nature of migration and remittances implies a need to carefully spell out the rationale for interventions It also notices the lack of good migration data and proper evaluations of migration related government policies The paper focuses mainly on microeconomic evidence about international migration but much of the discussion extends to other settings as well

Work-related Migration and Poverty Reduction in Nepal Michael Lokshin, Mikhail Bontch-Osmolovski, Elena E. Glinskaya, 2007 Using two rounds of nationally representative household survey data in this study the authors measure the impact on poverty in Nepal of local and international migration for work They apply an instrumental variable approach to deal with nonrandom selection of migrants and simulate various scenarios for the different levels of work related migration comparing observed and counterfactual household expenditure distribution The

results indicate that one fifth of the poverty reduction in Nepal occurring between 1995 and 2004 can be attributed to increased levels of work related migration and remittances sent home The authors also show that while the increase in work migration abroad was the leading cause of this poverty reduction internal migration also played an important role The findings show that strategies for economic growth and poverty reduction in Nepal should consider aspects of the dynamics of domestic and international migration

Migration, Development and Poverty Reduction in Asia International Organization for Migration,2005 This publication contains background papers and presentations made for an IOM regional conference held in Lanzhou China in March 2005 to discuss internal migration and its effects on the development of Asian countries focusing on the contribution that internal migrants make to local and national development including poverty reduction and how this can be complemented by strategies to reduce the risks of migration for poor people

Migrants, Livelihoods and Rights Arjan de Haan,2000 Argues that policies should aim to support migration and recognize the centrality of migration for the households livelihoods Based on a description of the complex composition of migration streams the effects of migration and the idea of migration as a social process

Poverty and International Migration Şebnem Eroğlu,2022-10-03 This book examines the poverty outcomes for three generations of settler migrants spanning multiple European destinations as compared with their returnee and stayer counterparts living in Turkey

Poverty, International Migration and Asylum G. Borjas,J. Crisp,2005-03-01 This book examines the economic consequences of immigration and asylum migration it focuses on the economic consequences of legal and illegal immigration as well as placing the study of immigration in a global context

Immigration, Poverty, and Socioeconomic Inequality David Card,Steven Raphael,2013-07-31 The rapid rise in the proportion of foreign born residents in the United States since the mid 1960s is one of the most important demographic events of the past fifty years The increase in immigration especially among the less skilled and less educated has prompted fears that the newcomers may have depressed the wages and employment of the native born burdened state and local budgets and slowed the U S economy as a whole Would the poverty rate be lower in the absence of immigration How does the undocumented status of an increasing segment of the foreign born population impact wages in the United States In *Immigration Poverty and Socioeconomic Inequality* noted labor economists David Card and Steven Raphael and an interdisciplinary team of scholars provide a comprehensive assessment of the costs and benefits of the latest era of immigration to the United States *Immigration Poverty and Socioeconomic Inequality* rigorously explores shifts in population trends labor market competition and socioeconomic segregation to investigate how the recent rise in immigration affects economic disadvantage in the United States Giovanni Peri analyzes the changing skill

composition of immigrants to the United States over the past two decades to assess their impact on the labor market outcomes of native born workers Despite concerns over labor market competition he shows that the overall effect has been benign for most native groups Moreover immigration appears to have had negligible impacts on native poverty rates Ethan Lewis examines whether differences in English proficiency explain this lack of competition between immigrant and native born workers He finds that parallel Spanish speaking labor markets emerge in areas where Spanish speakers are sufficiently numerous thereby limiting the impact of immigration on the wages of native born residents While the increase in the number of immigrants may not necessarily hurt the job prospects of native born workers low skilled migration appears to suppress the wages of immigrants themselves Michael Stoll shows that linguistic isolation and residential crowding in specific metropolitan areas has contributed to high poverty rates among immigrants Have these economic disadvantages among low skilled immigrants increased their dependence on the U S social safety net Marianne Bitler and Hilary Hoynes analyze the consequences of welfare reform which limited eligibility for major cash assistance programs Their analysis documents sizable declines in program participation for foreign born families since the 1990s and suggests that the safety net has become less effective in lowering child poverty among immigrant households As the debate over immigration reform reemerges on the national agenda *Immigration Poverty and Socioeconomic Inequality* provides a timely and authoritative review of the immigrant experience in the United States With its wealth of data and intriguing hypotheses the volume is an essential addition to the field of immigration studies A Volume in the National Poverty Center Series on Poverty and Public Policy

Global Connections and Emerging Inequalities in Europe Deema Kaneff, Frances Pine, 2011 This book explores connections between poverty and migration in the context of the expansion of neoliberalism in Europe The last decade has witnessed a massive movement of people in response to rising inequalities as a result of political changes and economic reforms implemented across the continent As people seek new opportunities movement itself becomes part of the process of generating new inequalities The chapters in this volume provide vivid examples of local participation in such global processes

Surviving on the Move Jonathan Crush, Bruce Frayne, 2010 Since the collapse of apartheid there have been major increases in migration flows within to and from the Southern African region Cross border movements are at an all time high across the region and internal migration is at record levels The implications of greater mobility for areas of origin and destination have not been systematically explored Migration is most often seen as a negative phenomenon a result of increased poverty and the failure of development More recently the positive relationship between migration and development has been emphasised by agencies such as the Global Commission on International Migration the Global Forum on Migration and Development the United Nations Development Programme and the African Union The chapters in this publication are all based on primary research and examine various facets of the relationship between migration poverty and development including issues that are often ignored in the migration development debate like migration and food security and migration

and vulnerability to HIV The book argues that the development and poverty reduction potential of migration is being hindered by national policies that fail to recognise and build on the positive aspects and potential of migration As a result as these studies show migrants are often pushed to the margins where they are forced to survive on the move Their treatment violates labour laws and basic human rights and compromises the potential of migration as a means to create sustainable livelihoods reduce poverty and food insecurity mitigate the brain drain and promote the productive use of remittances This book shows that migrant lives and livelihoods should be at the centre of international and African debates about migration poverty and development

International Migration, Remittances, and Poverty in Developing Countries John Page, 2016 Few studies have examined the impact of international migration and remittances on poverty in a broad cross section of developing countries Adams and Page try to fill this gap by constructing a new data set on poverty international migration and remittances for 74 low and middle income developing countries Four key findings emerge International migration defined as the share of a country's population living abroad has a strong statistical impact in reducing poverty On average a 10 percent increase in the share of international migrants in a country's population will lead to a 1.9 percent decline in the share of people living in poverty 1.00 a person a day Distance to a major labor receiving region like the United States or OECD Europe has an important effect on international migration Developing countries that are located closest to the United States or OECD Europe are also those countries with the highest rates of migration An inverted U shaped curve exists between the level of country per capita income and international migration Developing countries with low or high per capita GDP produce smaller shares of international migrants than do middle income developing countries The authors find no evidence that developing countries with higher levels of poverty produce more migrants Because of considerable travel costs associated with international migration international migrants come from those income groups which are just above the poverty line in middle income developing countries International remittances defined as the share of remittances in country GDP have a strong statistical impact in reducing poverty On average a 10 percent increase in the share of international remittances in a country's GDP will lead to a 1.6 percent decline in the share of people living in poverty This paper a product of the Poverty Reduction Group Poverty Reduction and Economic Management Network is part of a larger effort in the network to understand better how international migration and remittances affect poverty in developing countries

International Migration, Remittances, and Poverty in Developing Countries Richard H. Adams, John Page, 2003

Immigrants and Poverty Beatrice Eugster, 2018-06-21 Inequality has been rising in advanced industrialised countries At the same time increased immigration has accentuated the ethnic diversity of those countries Both developments have created challenges for advanced industrialised countries to integrate immigrants into the country Immigration and Poverty examines how advanced industrialised countries integrate immigrants into the labour market and welfare state and how this influences immigrant poverty The main argument draws on insights from two research strands the comparative welfare state and the

migration literature In brief this book argues that a country s labour market and welfare system does not directly influence immigrants poverty but is conditional on immigrants social rights here understood as their labour market and welfare state access Immigration and Poverty argues and shows that it is crucial to embed migration specific policies within a country s prevailing institutional setting to understand why immigrants fare better in some countries as compared to others **Rural Poverty, Migration, and the Environment in Developing Countries** Richard E. Bilborrow,1992 Case studies of the links between highlands and lowlands in Latin America of transmigration in Indonesia and of migration and desertification in the Sudan illustrate the relationship between poverty internal migration and environmental change in rural areas of developing countries **Poverty and International Migration** Sebnem Eroglu,2022 Drawing on the largest database available on labour migration to Europe this book examines the poverty outcomes for three generations of settler migrants spanning multiple European destinations as compared with their returnee and stayer counterparts living in Turkey
