Migration and the Making of Global Christianity Jehu J. Hanciles, 2021-03-16 A magisterial sweep through 1500 years of Christian history with a groundbreaking focus on the missionary role of migrants in its spread Human migration has long been identified as a driving force of historical change Building on this understanding Jehu Hanciles surveys the history of Christianity's global expansion from its origins through 1500 CE to show how migration more than official missionary activity or imperial designs played a vital role in making Christianity the world's largest religion Church history has tended to place a premium on political power and institutional forms thus portraying Christianity as a religion disseminated through official representatives of church and state But as Hanciles illustrates this top down perspective overlooks the multifarious array of social movements cultural processes ordinary experiences and non elite activities and decisions that contribute immensely to religious encounter and exchange Hanciles's socio historical approach to understanding the growth of Christianity as a world religion disrupts the narrative of Western preeminence while honoring and making sense of the diversity of religious expression that has characterized the world Christian movement for two millennia In turning the focus of the story away from powerful empires and heroic

missionaries Migration and the Making of Global Christianity instead tells the more truthful story of how every Christian migrant is a vessel for the spread of the Christian faith in our deeply interconnected world

The Complete Atlas of World History, 1997 Text maps and illustrations present the history of the world from 4 000 000 BC to 1997

Migration and Mortality in Africa and the Atlantic World, 1700-1900 Philip D. Curtin, 2001 These papers explore the history of the tropical regions of the Atlantic basin sometimes focused on the Caribbean sometimes on Africa but always with a comparative dimension The Atlantic basin is central to most of these comparisons but they are a part of an even broader effort to capture the perspective of world history Some deal with the shores of the Atlantic in the framework of economic history but the author's concern is most particularly with the role of the environment in history especially the disease environment Disease was particularly important for migrants who moved from one disease environment to another In the tropical Atlantic disease was a crucial factor in the formation of the slave trade affecting both the involuntary passengers and those who came out from Europe to manage the trade

International Migration and Liberal Democracies Axel Schulte, 2000 The study of international migration underscores two principles of the modern world and brings them forward for debate the sovereignty of the nation state on the one hand and an open world free of border control and market constraints on the other Volume II of the Yearbook Migration confronts basic concepts of international migration control through a political theory lens In contrast to pessimistic interpretations of a global migration crisis and the Fortress Europe mind set the American political scientist James F. Hollifield finds quite the opposite as he emphasizes the liberalization of immigration policies among major democracies throughout North America and Europe According to Hollifield the expansion of civil rights and a general international liberalization constitutes the basis for this process Hollifield explains his rights based approach by tracing the civil rights revolution in the United States coupled with the impact of the liberal German Grundgesetz Basic Law and subsequent European unification He asserts that a positive relationship between market orientated democracies and liberal immigration policies do exist and therefore contribute to this continued liberalization The three major questions he poses centers around control sovereignty and incorporation Following Hollifield's analysis German political scientists Herbert Dittgen and Oliver Schmittke build on this approach utilizing supporting data on the German case German born Karen Schonwalder challenges

Hollifield's thesis of republican liberalization utilizing the British case as she highlights the politics of exclusion in Britain Karl Markus Kreis illustrates Hollifield's findings by underscoring the decline of ethnic identity among European immigrants in the United States Finally the Turkish American political scientist Nedim Ogelman concludes this study by describing the dynamic of the Latin American communities and the role they play in speeding up the naturalization process in the US In contrast to the widespread migration pessimism and communitarian ideologies of exclusion Volume II Yearbook Migration contains empirical and theoretical analyses which emphasize liberal dimensions of immigration Series Studien zu Migration und Minderheiten Studies in Migration and Minorities Vol 9
