by remittance flows globally The book is a first of its kind attempt to analyze the effects of an ongoing crisis on remittance flows globally Data analyzed by the book reveals three trends First The more diversified the destinations and the labour markets for migrants the more resilient are the remittances sent by migrants Second the lower the barriers to labor mobility the stronger the link between remittances and economic cycles in that corridor And third as remittances proved to be relatively resilient in comparison to private capital flows many remittance dependent countries became even more dependent on remittance inflows for meeting external financing needs There are several reasons for migration and remittances to be relatively resilient to the crisis First remittances are sent by the stock cumulative flows of migrants not only by the recent arrivals in fact recent arrivals often do not remit as regularly as they must establish themselves in their new homes Second contrary to expectations return migration did not take place as expected even as the financial crisis reduced employment opportunities in the US and Europe Third in addition to the persistence of migrant stocks that lent persistence to remittance flows existing migrants often absorbed income shocks and continued to send money home Fourth if some migrants did return or had the intention to return they tended to take their savings back to their country of origin Finally exchange rate movements during the crisis caused unexpected changes in remittance behavior as local currencies of many remittance recipient countries depreciated sharply against the US dollar they produced a sale effect on remittance behavior of migrants in the US and other destination countries
