Making Home(s) in Displacement Luce Beeckmans, Alessandra Gola, Ashika Singh, Hilde Heynen, 2022-01-17 Making Home s in Displacement critically rethinks the relationship between home and displacement from a spatial material and architectural perspective Recent scholarship in the social sciences has investigated how migrants and refugees create and reproduce home under new conditions thereby unpacking the seemingly contradictory positions of making a home and overcoming its loss Yet making home s in displacement is also a spatial practice one which intrinsically

relates to the fabrication of the built environment worldwide Conceptually the book is divided along four spatial sites referred to as camp shelter city and house which are approached with a multitude of perspectives ranging from urban planning and architecture to anthropology geography philosophy gender studies and urban history all with a common focus on space and spatiality By articulating everyday homemaking experiences of migrants and refugees as spatial practices in a variety of geopolitical and historical contexts this edited volume adds a novel perspective to the existing interdisciplinary scholarship at the intersection of home and displacement It equally intends to broaden the canon of architectural histories and theories by including migrants and refugees spatial agencies and place making practices to its annals By highlighting the political in the spatial and vice versa this volume sets out to decentralise and decolonise current definitions of home and displacement striving for a more pluralistic outlook on the idea of home

Home Alison Blunt, Robyn Dowling, 2022-05-30

Home articulates a critical geography of home in which home is understood as an emotive place and spatial imaginary that encompasses lived experiences of everyday domestic life alongside a wider and often contested sense of being and belonging in the world Engaging with the burgeoning cross disciplinary interest in home since the first edition was published this significantly revised and updated second edition contains new research boxes illustrations and contemporary examples throughout It also adds a new chapter on Home and the City that extends the scalar understanding of home to the urban The book develops the conceptual and methodological underpinnings of a critical geography of home drawing on key feminist postcolonial and housing thinkers as well as contemporary methodological currents in non representational thinking and performance The book's chapters consider the making and unmaking of home across the domestic scale house as home the urban city as home national nation as home and homemaking in relation to transnational migration and diaspora Each chapter includes illustrative examples from diverse geographical contexts and historical time periods Chapters also address some of the key cross cutting dimensions of home across these scales including digital connectivity art and performance more than human constructions of home and violence and dispossession The book ends with a research agenda for home in a world of COVID 19 The book provides an understanding of home that has three intersecting dimensions that material and imaginative geographies of home are closely intertwined that home power and identity are intimately linked and that geographies of home are multi scalar This framework the examples used to illustrate it and the intended audience of academics and students across the humanities and social sciences will together shape the field of home studies into the future

**Everyday Equalities** Ruth Fincher, Kurt Iveson, Helga Leitner, Valerie Preston, 2019-08-13 A timely new look at coexisting without assimilating in multicultural cities If city life is a being together of strangers what forms of being together should we strive for in cities with ethnic and racial diversity Everyday Equalities seeks evidence of progressive political alternatives to racialized inequality that are emerging from everyday encounters in Los Angeles Melbourne Sydney and Toronto settler colonial cities that established through efforts to dispossess and eliminate indigenous societies have been destinations for waves of immigrants from across the globe ever since Everyday Equalities finds such alternatives being developed as people encounter one another in the process of making a home earning a living moving around the city and forming collective actions or communities Here four leading scholars in critical urban geography come together to deliver a powerful and cohesive message about the meaning of equality in contemporary cities Drawing on both theoretical reflection and urban ethnographic research they offer the formulation being together in difference as equals as a normative frame to reimagine the meaning and pursuit of equality in today's urban multicultures As the examples in Everyday Equalities indicate much emotional labor combined with a willingness to learn from each other negotiate across differences and agitate for change goes into constructing environments that foster being together in difference as equals Importantly the authors argue a commitment to equality is not only a hope for a future city but also a way of being together in the present

**Migration** Michael Samers, Michael Collyer, 2016-12-08 While the subject of migration has received enormous attention in academic journals and books across

the social sciences introductory texts on the matter are few and far between Even fewer books have explored migration through a critical and explicit engagement with spatial concepts Now in its second edition Migration remains the only text in more than a decade that emphasizes how geographical or spatial concepts can be used critically to understand migration The multi disciplinary text draws on insights from human geography political science social anthropology sociology and to a lesser extent economics All of the chapters focus on key terms theories concepts and issues concerning migration and immigration The book argues that in the context of migration two opposing spatial positions have emerged in the wake of the critique of methodological nationalism On one hand is the significance of transnationalism and on the other the importance of sub national or local processes Both require more nuance and integration while many of the concepts and theories which have thus far neglected space or have not been treated spatially need to be re written with space in mind Pedagogically the text combines a carefully defined structure accessible language boxes that explore case studies of migrant related experiences in particular places annotated suggestions for further reading useful websites and relevant films and summary questions for student learning at the end of each chapter Migration provides a critical multi disciplinary advanced and theoretically informed introduction to migration and immigration Revised and updated with new material new maps and illustrations and an accompanying website <https://migration2ndedition.wordpress.com> it continues to be aimed at advanced undergraduates and Masters level graduate students undertaking courses on migration and immigration
