*Occupational Therapy Intervention Process Model* Anne G. Fisher, 2009 Med bidrag fra Lou Ann Griswold

*Occupational Therapy Models for Intervention with Children and Families* Sandra Barker Dunbar, 2007 This textbook explores recent theoretical models that enable occupational therapists to practice and interact with families in a more holistic and occupation centered manner. It offers the latest information on viewing the broader contexts of environment and family in order to meet diverse occupational needs in a range of settings. The editor presents a variety of case scenarios that feature culturally diverse populations and varying diagnoses of children with occupational needs. With contributions from 11 leaders in occupational therapy, this comprehensive text is designed to increase awareness and understanding of theoretical models and their relationship to current occupational therapy practice with today's children and families. Traditional frames of reference in pediatric practice are explored including sensory integration and neurodevelopmental treatment. Some current theoretical models discussed include the Model of Human Occupation, the Person Environment Occupation model, the Ecology of Human Performance model, and the Occupational Adaptation model. The new Occupational Therapy Practice Framework is incorporated throughout the text. Overall the textbook employs a practical approach to this significant aspect of pediatric practice in occupational therapy.

**International Handbook of Occupational Therapy Interventions** Ingrid Söderback, 2009-06-12 Resources for rehabilitation specialists tend to follow a straight line: injury, disability, limitation, intervention. The book's wide spectrum of interventions, coupled with its international perspective, creates a unique source of evidence-based strategies for improving patients' adaptation, functioning, relearning, recovery, and the prevention of ill health. The Handbook Describes interventions in such areas as environmental accessibility, ergonomics, pain management, sensory, functional training, electric prostheses, music therapy, psychoeducation, and cognitive teaching. Features interventions suited to all areas of daily life: self-maintenance, home, work, and leisure. Clarifies the occupational therapist's role in multidisciplinary
