**Middle School Math, Course 3** McDougal Littell Incorporated, 2004 *Tablets in K-12 Education: Integrated Experiences and Implications* An, Heejung, Alon, Sandra, Fuentes, David, 2014-07-31 This book explores the use of hand held mobile devices in primary and secondary classrooms to assist in learning sharing and communication among students and teachers Provided by publisher *The Differentiated Math Classroom* Miki Murray, 2007 In every mathematics classroom the need for differentiated instruction is

present in many it's acute. Students learn at different rates in different ways with different successes and different challenges. Instruction must be flexible enough to meet everyone's needs and nurturing enough to not only support growth but also address the frustration that often leads to mathphobia. The Differentiated Math Classroom can help make high quality differentiated instruction a classroom reality. It's the usable comprehensive resource teachers need to help students of all levels and abilities succeed with math. Whether you teach math sixty minutes a day or six periods a day, The Differentiated Math Classroom describes both the big ideas of differentiation and the day to day teaching that makes it work. Miki Murray and Jenny Jorgensen present everything you need to get started and to help all students meet national standards including ideas for Setting up a classroom to maximize opportunities for differentiation and establish community. Getting to know students' strengths and needs through high quality assessments. Devising anchor activities that help students work independently with meaningful math content while you free up time for individual instruction. Creating tiered lessons that scaffold content and provide the flexibility to challenge some students and offer assistance to others. Murray and Jorgensen offer practical ideas for planning and designing units that engage students and facilitate learning about important math concepts as well as teaching tools, questions for professional reflection and answers to teachers' most frequently asked questions about differentiation. Discover that differentiated instruction is a flexible framework that supports all math learners. Filled with examples from real classes and samples of student work, The Differentiated Math Classroom will help every child learn more effectively by showing you how to think about students' mathematics and your teaching in powerful new ways.

**Rethinking Disability and Mathematics** Rachel Lambert, 2024-04-15. Every child has a right to make sense of math and to use math to make sense of their worlds. Despite their gifts, students with disabilities are often viewed from a deficit standpoint in mathematics classrooms. These students are often conceptualized as needing to be fixed or remediated. Rethinking Disability and Mathematics argues that mathematics should be a transformative space for these students, a place where they can discover their power and potential and be appreciated for their many strengths. Author Rachel Lambert introduces Universal Design for Learning for Math (UDL Math), a way to design math classrooms that empowers disabled and neurodiverse students to engage in mathematics in ways that lead to meaningful and joyful math learning. The book showcases how UDL Math can open up mathematics classrooms so that they provide access to meaningful understanding and an identity as a math learner to a wider range of students. Weaved throughout the book are the voices of neurodiverse learners telling their own stories of math learning. Through stories of real teachers recognizing the barriers in their own math classrooms and redesigning to increase access, the book reframes students with disabilities from a deficit to an asset perspective, paving the way for trusting their mathematical thinking. Offers equitable math instruction for all learners, including those with disabilities, neurodiverse students, and/or multilingual learners. Applies UDL to the math classroom, providing practical tips and techniques to support students' cognitive, affective, and strategic development. Immerses readers

in math classrooms where all students are engaged in meaningful mathematics from special education day classes to inclusive general education classrooms from grades K-8. Integrates research on mathematical learning including critical math content such as developing number sense and place value fluency with math facts and operations and understanding fractions and algebraic thinking. Explores critical issues such as writing IEP goals in math. This book is designed for all math educators both those trained as general education teachers and those trained as special education teachers. The UDL Math approach is adapted to work for all learners because everyone varies in how they perceive the world and in how they approach mathematical problem solving. When we rethink mathematics to include multiple ways of being a math learner we make math accessible and engaging for a wider group of learners.

*Beyond Books, Butts, and Buses* Rebecca Good, 2014-03-18 Beyond Books Butts and Buses Ten Steps to Help Assistant Principals Become Effective Instructional Leaders is intended for ambitious future

principals who recognize the importance of researching and preparing for that esteemed position. It contains ten steps that will lead those who are stuck in the duty world of books, butts and buses to find ways to prepare for instructional leadership. This book lays out strategies, suggestions and checklists that will help support the learning. There are scripts, organizational tools and rationales for following through on the implementation of these steps. There are also samples of different types of walk-throughs, agendas and planners to help one get and stay organized. A campus administrator position is a hectic crisis of the moment type of job and these chapters address how to handle these moments or how to head them off. The need for balance in one's life is spoken to as well with a chapter devoted to how to avoid burnout. This is a must read for assistant principals serious about wanting to prepare themselves for the top position in a school.
