Introduction to Critical Thinking – Paul-Elder/Paulian Critical Thinking

- *Best thinkers think about their thinking.*
They DO NOT take thinking for granted, or trust fate. They DO notice their thinking, reflect on their thinking, and act upon their thinking.
- *Best thinkers are highly purposeful.*
They know why they think, know what they are about, have clear priorities and goals, and continually check themselves to assure their alignment with their goals.
- *Best thinkers have intellectual tools they use to check the quality of their thinking.*
They know how to clearly express their thinking. Know how to check for accuracy and precision. Know how to keep focused on a question and assure it's relevant to their goals. They think beneath the surface and expand across multiple perspectives. They think logically and significantly.
- *Best thinkers distinguish thoughts from feelings and desires.*
Wanting something to be something does not make it so. They understand others and their own feelings, but do not let emotions determine decisions. They have discovered their minds and examine the way their minds operate. They take deliberate charge of the operations.
- *Best thinkers routinely evaluate thinking, determining its strengths and weaknesses.*
They realize that trust cannot be put into automatic evaluation of their own mind and that evaluative thinking is an art one must consciously learn. It takes knowledge of universal standards for thinking and practice in exercising control over them.

Taking control of your thinking and implementing tools for reasoning allow you to command your thinking that will command the quality of your life.

Critical Thinking – art of analyzing and evaluating thinking with a view to improving it

Results: raises vital questions and problems, formulating them clearly and precisely; gathers and assess relevant information, using abstract ideas to interpret it effectively; comes to well-reasoned conclusions and solutions, testing against relevant standards; thinks open-mindedly within alternative systems of thought, recognizing, and assessing, their assumptions, implications, and consequences; communicates effectively with others to find solutions to complex problems.

Main Thinkers

1. Naïve Thinker – doesn't care and/or isn't aware of their thinking; don't see importance to work on their thinking and don't want to develop their minds.
2. Selfish Critical Thinker – good at thinking, but unfair to others; critical thinkers use thinking to get what they want.
3. Fairminded Critical Thinker – good at thinking and fair to others; always improving thinking and make world a better place.

Weak vs. Strong Critical Thinking

Weak-sense critical thinking/sophist – they use critical thinking, but miss higher-level skills and values of CT and fails to consider multiple viewpoints; served by self-interest.

Sophistry – art of winning arguments regardless of the problems/errors that are used in the thinking and regardless of viewpoints being ignored. Lower-level skills of rhetoric (argumentation) by making unreasonable thinking look reasonable, and vice-versa.

Techniques for Fostering Collaboration in Online

Learning Communities: Theoretical and Practical Perspectives Pozzi, Francesca, Persico, Donatella, 2010-09-30 This book provides a focused assessment of the peculiarities of online collaborative learning processes by looking at the strategies, methods and techniques used to support and enhance debate and exchange among peers. Provided by publisher. [Creating Significant Learning Experiences](#) L. Dee Fink, 2013-07-31 Dee Fink challenges our conventional assumptions and practices and offers an insightful approach to expanding our learning goals, making higher education more meaningful. This is a gem of a book that every college teacher should read. Ken Bain, author, *What the Best College Students Do*. Since the original publication of L. Dee Fink's *Creating Significant Learning Experiences*, higher education has continued to move in two opposite directions: more institutions encourage faculty to focus on research, obtaining grants and publishing, while accreditation agencies, policy makers, and students themselves emphasize the need for greater attention to the quality of teaching and learning. Now the author has updated his bestselling classic, providing busy faculty with invaluable conceptual and procedural tools for instructional design. Step by step, Fink shows how to use a taxonomy of significant learning and systematically combine the best research-based practices for learning-centered teaching with a teaching strategy in a way that results in powerful learning experiences. This edition addresses new research on how people learn; active learning and student engagement; includes illustrative examples from online teaching and reports on the effectiveness of Fink's time-tested model. Fink also explores recent changes in higher education nationally and internationally and offers more proven strategies for dealing with student resistance to innovative teaching. Tapping into the knowledge, tools, and strategies in *Creating Significant Learning Experiences* empowers educators to creatively design courses that will result in significant learning for their students. As thought-provoking and inspiring today as it was when it was first published, it is a must for anyone serious about creating courses that challenge students to learn deeply. Elizabeth F. Barkley, author, *Student Engagement Techniques*.

Mastery Through Quizzing Stan Skrabut, 2025-03-24 Clear your desks. You have a quiz. Few phrases spark more anxiety in students. The tension, the stomach knots, the panicked glances around the room. We've all been there. But what if quizzing wasn't something to dread? What if it became the key to deeper learning, greater confidence, and real mastery? *Mastery Through Quizzing* isn't just about testing knowledge; it's about transforming how we learn. Whether you're an educator, administrator, or instructional designer, this book will show you how to turn low-stakes assessments into powerful tools for engagement, retention, and long-term success. Discover how to shift from high-pressure exams to a growth-focused quizzing strategy that reduces anxiety and boosts confidence. Design questions that drive critical thinking, not just memorization. Leverage technology and test banks to make quizzes more effective and scalable. Implement a step-by-step *Mastery Quizzing Strategy* to help students achieve real understanding. Unlike traditional assessments that measure what students don't know, mastery quizzing helps them build knowledge step by step, reinforcing what they know and guiding them forward. With decades of experience in instructional technology and education, I've seen firsthand how this method can transform

classrooms I'm sharing the approach to help you move beyond outdated testing models and create a learning experience that works. It's time to rethink quizzing. Let's turn it from a source of stress into a stepping stone for mastery. Scroll up and grab your copy today.
