A Client-server Shell Architecture for Distributed Programming Stuart Sechrest,1988 The PPM Services provide an interface that hides many of the details of the underlying system from their clients They can be implemented on a variety of systems and their facilities used to support login sessions spanning machines running heterogeneous operating systems Distributed jobs can thus take advantage of the facilities of different systems without losing the ability to interact through a single interface A prototype of the PPM Services for UNIX 4 BSD is described as well as the applicability of the PPM Services to other operating systems Several issues related to the design of command interpreters for distributed login sessions are discussed as well as a description of a prototype command interpreter **Using ARPA Services** ,1991

Texas Instruments Technical Journal ,1994 Returning Migrant Workers United Nations. Economic and Social Commission for Asia and the Pacific,1986 The research reports and statements by government representatives contained in this volume were presented at the Policy Workshop on International Migration in Asia and the Pacific held at Bangkok from 15-21 October 1985 The workshop was the final activity of a 2 year Economic and Social Commission for Asia and the Pacific ESCAP project on international migration policy in Asia and the Pacific funded by the UN Fund for Population Activities The 2nd phase of the project includes the studies reported in this volume which were intended to be exploratory They were meant to assess the current state of knowledge regarding return migration and to identify critical issues that would require further investigation 5 of the studies are concerned with return migration from temporary employment primarily in the Middle East Because many of the labor sending countries of the Mediterranean basin experienced a rapid expansion of labor emigration largely to northern and western Europe and a contraction of the flow and increase in return migration prior to current trends in Asian labor migration it was felt that a background paper on that experience would be value to policy makers in the ESCAP region Migration from the Pacific sub region of ESCAP is both of more variable duration and less heavily labor oriented than temporary migration from Asian countries to the Middle East The workshop s objectives were 1 to bring together researchers

and policy makers to review carefully the results of the 7 studies carried out as part of the project 2 to relate the research findings to feasible government policies for the reintegration of returning labor migrants and 3 to make and disseminate policy recommendations to governments in the ESCAP region Networking Services Developer's Reference Library David Iseminger, 2000 This five volume reference set helps developers build applications that capitalize on the networking features and components of Windows Crammed full of useful information and organized in a sensible fashion this library provides timely information about networking technologies that are entirely new or largely revamped for Windows 2000 It also documents existing technologies that network enabled applications use every day and excerpts appropriate information from the Microsoft Platform SDK making this one of the most focused print resources available about Windows 2000 based networking technologies **Proceedings** ,1984 **CoCa** Erco Argante,1998 **The Personnel Administrator** ,1989
