Price Setting Truman F. Bewley, 2025-05-28 The prices of some products fluctuate dramatically while others remain more constant What accounts for these extreme differences Renowned economist Truman F Bewley investigates and elucidates this puzzling problem Its crux he argues is that differentiated product prices are usually stable whereas the prices of undifferentiated products for which buyers can easily find comparable substitutes are often volatile Although product differentiation gives producers market power this power alone does not guarantee price stability There are nearly undifferentiated products whose producers have market power yet for which prices are unstable Weakness of product differentiation makes it so advantageous for producers to compete on price that they do so and forego the benefits and stability of price collusion Producers of truly differentiated goods prefer to compete on product performance rather than price and find that reducing prices during recessions does little to increase demand Based on hundreds of interviews with businesspeople responsible for setting prices Bewley s book is an unusual and groundbreaking work with findings vital for economists students and policymakers A Book Sale How-To Guide Pat Ditzler, JoAnn Dumas, 2012-02-17 The authors provide a tested and successful formula for making money for local libraries in a practical and fun way a library book sale
