and equipment now available along with important practical advice to those who are vision challenged. The book is divided into two parts. Part One focuses on the day to day activities that low vision can affect from safety in your home or traveling outside to the handling of finances or one's home entertainment system. It discusses the latest technologies that can enable a person with eyesight problems to turn on a light, start a dishwasher or even answer a phone through the use of oral commands and that's just the tip of the iceberg. Part Two then provides a breakdown of the various kinds of helpful vision aid products now available. Because the authors understand the costs involved in purchasing such equipment, they include the names of those organizations and associations in an extensive Resources section along with various other crucial contacts about which those with low vision and their loved ones and caretakers need to know. Times have changed. Low Vision Matters provides a wealth of information that can vastly improve the daily life of a person living with vision loss or blindness.

Spent behind the Wheel Julietta Hua, Kasturi Ray, 2021-12-21 Exploring professional passenger driving and the gig economy through feminist theories of labor. Are taxi drivers in today's era of the ride-hail app performing care work akin to domestic and household labor? So argue the authors of *Spent behind the Wheel*. Bringing together sociological and legal perspectives with feminist theoretical insights, Julietta Hua and Kasturi Ray examine the case study of contemporary professional passenger driving in the United States. On the one hand, they show the rise of the gig economy has brought new attention to the industry of professional passenger driving. On the other hand, the vulnerabilities that professional drivers experience remain hidden. Drawing on interviews with drivers, labor organizers, and members of licensing commissions, as well as case law and other published resources, Hua and Ray argue that working for ride-hail companies like Uber and Lyft shares similarities with driving for taxi companies in the impact on driver lives. Lyft and Uber sell the idea of industry disruption, but in fact, they entrench long-standing modes of extracting the reproductive labor of their drivers for the benefit of consumer lives.

Reproductive labor conventionally understood as feminized labor is extracted but masked behind the masculinized racialized bodies of drivers Professional driving is thus best understood alongside domestic and other gendered service work as reproductive labors devalued and often demonetized to benefit the national economy Spent behind the Wheel is a must for readers interested in critical studies of technological change and the gig economy showing how drivers capacities are drained for the benefit of riders corporations and the maintenance of the racial state *Carpenter Peter James*
