*Shadow*

*Networks* Francisco Louçã, Michael Ash, 2018-10-03 The 2007-08 financial crisis surprised many economists and the public. But how did the crisis come about? Why was it so deep and why has the clean up been so slow and painful? Many accounts of the crisis focus on renegade activity in marginal financial sectors. *Shadow Networks* challenges this prevailing view and sets out to demonstrate that far from a dissident branch, the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank-based finance. The collapse was not an accident but baked into the system of finance from the start. *Shadow Networks* traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade-long crisis took shape. *Shadow Networks: Financial Disorder and the System that Caused Crisis* is a probing examination of the roles of the powerful elite. It traces the networks and institutions that support a finance-focused market-centered model of economy and society from their ascendancy to their surprising resilience in the face of manifest failures. *Мировая экономика и международные отношения*, 2015

*Economic Survey*, 2020 *Asian Development Outlook 2015*, 2015 **Public Policy**, 2017 *Bibliographic Guide to Business and Economics* New York Public Library. Research Libraries, 1988 **Arab Middle Class**, 2014 The present report studies the Arab middle class, an important social group that is relatively little understood despite the fundamental role it has played in shaping the economic and social development outcomes in the Arab region. This report contributes to the ongoing debate about factors that led to the Arab uprisings and the difficult transitions to democracy that followed the departure of long-standing dictators by marking elements influencing middle class allegiances, specifically those that weakened their well-established alliances with ruling regimes. The report is motivated by the conviction, on the basis of past development experiences, that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition. Studying the middle class is therefore crucial to interpreting the past, understanding the present, and reading the potential future development prospects of the Arab region. This report introduces three novel approaches aimed at charting a path for sustaining, empowering, and enlarging the middle class. The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure. The second relates to the profiling of the Arab middle class using variables such as education, employment, and mobility in addition to multidimensional poverty. The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective. The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental state. Publisher's description *Industrial Development Report* United Nations Publications, 2016-01-14 This report looks at how technology and innovation achieves inclusive and sustainable industrial development. ISID's main finding is that ISID is feasible and technology can simultaneously serve all three dimensions of sustainability including economic, social, and environmental. Rapid, inclusive, and

sustainable industrialization can happen more frequently provided that policymakers firmly steer the industrialization process with opportune policies and avoid past mistakes In some cases the spread of technology has not materialized in concrete growth opportunities because of the lack of technological capabilities Innovation needs to be supported by interventions strengthening the process from invention to adoption as capabilities are developed and high tech manufacturing sectors are created seeing higher rates of sustainable growth
