Name: \_\_\_\_\_

Directions: In your groups of 2, complete the worksheet below. Each question should be answered by a different partner (i.e. you should not answer multiple questions in a row). Initial by the questions you complete.

1. A male and female bird have 4 unhatched eggs. The female is on the left heterozygous; the male on the right is homozygous recessive. Use B or b for your genotypes.

a. Write the genotype of the female (left) below:

Bb

b. Write the genotype of the male (right) below:

bb

c. Which color is dominant, gray or black? How do you know?

The dominant color is gray since the female is the gray and the heterozygous one (Bb).

d. Write the phenotype of the female and the phenotype of the male below:

(female) = gray      (male) = black

e. Complete the Punnett Square below for this couple:

	B	b
b	Bb	bb
b	Bb	bb

f. If they follow the Punnett Square ratios, what will the babies in the eggs look like when they hatch?

There is a 50% probability that the babies will look like gray and there is also a 50% probability that the babies will look like black.

g. Will all four offspring adhere exactly to the ratios predicted by the Punnett Square? Explain

No, since we cannot foretell something to come out exactly from the result of the ratio.

The Punnett square is only for prediction, it is not 100% sure guaranteed that the answer from our solution will become the exact outcome.

*Hint: If I flip a coin and get heads 5 times in a row, what is the likelihood that I will get heads on the next flip?*
