**Baptism Through Incision** Martha Few, Zeb Tortorici, Adam Warren, 2020-02-19 In 1786 Guatemalan priest Pedro José de Arrese published a work instructing readers on their duty to perform the cesarean operation on the bodies of recently deceased pregnant women in order to extract the fetus while it was still alive. Although the fetus's long term survival was desired the overarching goal was to cleanse the unborn child of original sin and ensure its place in heaven. *Baptism Through Incision* presents Arrese's complete treatise translated here into English for the first time with a critical introduction and excerpts from related primary source texts. Inspired by priests' writings published in Spain and Sicily beginning in the mid-eighteenth century Arrese and writers like him in Peru, Mexico, Alta California, Guatemala, and the Philippines penned local medico-religious manuals and guides for performing the operation and baptism. Comparing these texts to one another and placing them in dialogue with archival cases and print culture references this book traces the genealogy of the postmortem cesarean operation throughout the Spanish Empire and reconstructs the transatlantic circulation of obstetrical and scientific knowledge around childbirth and reproduction. In doing so it shows that knowledge about cesarean operations and fetal baptism intersected with local beliefs and quickly became part of the new ideas and scientific medical advancements circulating broadly among transatlantic Enlightenment cultures. A valuable resource for scholars and students of colonial Latin American history the history of medicine and the history of women reproduction and childbirth. *Baptism Through Incision* includes translated excerpts of works by Spanish surgeon Jaime Alcalá y Martínez Mexican physician Ignacio Segura and Peruvian friar Francisco González Laguna as well as late colonial Guatemalan instructions and newspaper articles published in the *Gazeta de México* the *Gazeta de Guatemala* and the *Mercurio Peruano*.

Brooks, Udo Schumacher, 2008-02-02 The process of metastasis formation is hugely complex as described in the introductory chapter of this book and this complexity has led us to compile two volumes of methods from a vastly divergent background that attempts to encompass the whole spectrum of cancer biology. This first volume *Metastasis Research Protocols Analysis of Cells and Tissues* concentrates on analysis and mapping of molecules produced by cells and tissues and analysis of the molecular biology underlying their expression whereas the second volume *Metastasis Research Protocols Cell Behavior In Vitro and In Vivo* focuses sharply on the determination of cell behavior in vitro and in vivo. We have deliberately included chapters describing well established and familiar techniques for example SDS-PAGE and Western blotting Chapter 11 and immunocytochemistry Chapter 2 in addition to the newer and more specialized approaches and specific examples of their application because although the methodology is readily available in the published

literature and established in many laboratories we wished these volumes to stand alone and to make accessible here the standard techniques that underpin much metastasis research for both the newcomer to the field and the seasoned researcher Undoubtedly owing to the complexity of the metastatic cascade and the wealth of research techniques involved in scientific approaches to its unraveling and despite our best efforts to make these volumes as comprehensive as seems feasible this is a tall order and there will inevitably be omissions For these we apologize    **The American Catalogue** ,1941 American national trade bibliography    **Engineering in Our Environment** Canadian Society for Civil Engineering.
