Metaphor And Cognition An Interactionist Approach Studies In Cognitive Systems:

Metaphor and Cognition B. Indurkha, 2013-03-09 Many metaphors go beyond pointing to the existing similarities between two objects they create the similarities Such metaphors which have been relegated to the back seat in most of the cognitive science research are the focus of attention in this study which addresses the creation of similarity within an elaborately laid out interactive framework of cognition Starting from the constructivist views of Nelson Goodman and Jean Piaget this framework resolves an apparent paradox in interactionism how can reality not have a mind independent ontology and structure but still manage to constrain the possible worlds a cognitive agent can create in it A comprehensive theory of metaphor is proposed in this framework that explains how metaphors can create similarities and why such metaphors are an invaluable asset to cognition The framework is then applied to related issues of analogical reasoning induction and computational modeling of creative metaphors

The Logic of Metaphor Eric Steinhart, 2013-06-29 1 Metaphors and Logic Metaphors are among the most vigorous offspring of the creative mind but their vitality springs from the fact that they are logical organisms in the ecology of language I aim to use logical techniques to analyze the meanings of metaphors My goal here is to show how contemporary formal semantics can be extended to handle metaphorical utterances What distinguishes this work is that it focuses intensely on the logical aspects of metaphors I stress the role of logic in the generation and interpretation of metaphors While I don't presuppose any formal training in logic some familiarity with philosophical logic the propositional calculus and the predicate calculus is helpful Since my theory makes great use of the notion of structure I refer to it as the structural theory of metaphor STM STM is a semantic theory of metaphor if STM is correct then metaphors are cognitively meaningful and are non-trivially logically linked with truth I aim to extend possible worlds semantics to handle metaphors I'll argue that some sentences in natural languages like English have multiple meanings Juliet is the sun has at least two meanings the literal meaning Juliet is the sun and the metaphorical meaning Juliet is the sun MET Each meaning is a function from possible worlds to truth values I deny that these functions are identical I deny that the metaphorical function is necessarily false or necessarily true

Prerational Intelligence: Adaptive Behavior and Intelligent Systems Without Symbols and Logic, Volume 1, Volume 2 Prerational Intelligence: Interdisciplinary Perspectives on the Behavior of Natural and Artificial Systems, Volume 3 Holk Cruse, Jeffrey Dean, Helge Ritter, 2013-11-11 The present book is the product of conferences held in Bielefeld at the Center for interdisciplinary Studies ZiF in connection with a year long ZiF Research Group with the theme Prerational intelligence The premise explored by the research group is that traditional notions of intelligent behavior which form the basis for much work in artificial intelligence and cognitive science presuppose many basic capabilities which are not trivial as more recent work in robotics and neuroscience has shown and that these capabilities may be best understood as emerging from interaction and cooperation in systems of simple agents elements that accept inputs from and act upon their surroundings The main focus is on the way animals and artificial systems process in

formation about their surroundings in order to move and act adaptively The analysis of the collective properties of systems of interacting agents however is a problem that occurs repeatedly in many disciplines Therefore contributions from a wide variety of areas have been included in order to obtain a broad overview of phenomena that demonstrate complexity arising from simple interactions or can be described as adaptive behavior arising from the collective action of groups of agents To this end we have invited contributions on topics ranging from the development of complex structures and functions in systems ranging from cellular automata genetic codes and neural connectivity to social behavior and evolution Additional contributions discuss traditional concepts of intelligence and adaptive behavior 1 *Prerational Intelligence* Holk

Cruse, Jeffrey Dean, Helge Ritter, 2000 **Superminds** Selmer Bringsjord, Michael John Zenzen, 2003-03-31 This is the first book length presentation and defense of a new theory of human and machine cognition according to which human persons are superminds Superminds are capable of processing information not only at and below the level of Turing machines standard computers but above that level the Turing Limit as information processing devices that have not yet been and perhaps can never be built but have been mathematically specified these devices are known as super Turing machines or hypercomputers Superminds as explained herein also have properties no machine whether above or below the Turing Limit can have The present book is the third and pivotal volume in Bringsjord's supermind quartet the first two books were *What Robots Can and Can't Be* Kluwer and *AI and Literary Creativity* Lawrence Erlbaum The final chapter of this book offers eight prescriptions for the concrete practice of AI and cognitive science in light of the fact that we are superminds *Miscellanea in Honorem Josephi Vergote*, 1999 *Critical Issues in User Interface Systems Engineering* David Benyon, 1996 It takes a thoroughly integrated approach to the topic based on the principle that systems development can not be divided into design and implementation Instead the topic is assessed from a number of different viewpoints each of which reflects a different perspective on the products processes behaviour and construction of user interface software *Researching and Applying Metaphor* Graham Low, Lynne Cameron, 1999-02-11 This book demonstrates how metaphor needs to be researched using multiple methods of investigation *The Cumulative Book Index*, 1994 A world list of books in the English language
