Metapolitics, Algorithms and Violence Ico Maly, 2023-11-01 Metapolitics Algorithms and Violence argues that we need a more finegrained approach to understand contemporary far right violence an approach that takes language and cultural production in a digital economy seriously This book underlines the importance of socio political economic historical and technological context in understanding the rise of the new right More concretely based on a digital ethnographic approach it argues that we should understand this violence and the contemporary rise of new far right practices and actors in relation to the theoretical renewal of La Nouvelle Droite in the 20th century the democratization of new right metapolitics in the 21st century as a result of the rise of digital media and the development of a layered transnational and polycentric new right cultural niche in which far right activists and terrorists produce identity discourse digital cultures and practices This work will be an engaging and necessary read for researchers interested in social media digital culture far right politics extremism and terrorism

**Metascience and Politics** A. James Gregor, 2020-03-25 A central problem in political inquiry is the conceptual and linguistic informality of political science For most of its history the discipline has been largely pursued with the analytic and logical machinery of ordinary language Likewise there has been little effort to standardize how language is used or to systematize theoretical procedures to insure methodological uniformity In an effort to better understand and defend the research processes that attend sustain and foster the systematic credibility of political science Gregor argues a special conceptual language is needed to enhance the rigor replicability articulation and interpretation of political science s empirical findings Gregor reviews the conceptual inventory of the social sciences in general with particular emphasis on distinctions between descriptive theoretical and normative language He analyzes what might count as objectivity and truth in a given set of circumstances in an effort to standardize how political scientists make such distinctions How theory and explanation might be assessed in less rigorous disciplines is also considered Gregor is opposed to the postmodernist tendency to use language games in the social sciences that purport to close the gaps

separating the discourses of knowledge ethics and politics but do so at the expense of clarity rigor and objectivity In Gregor s view these alternative perspectives have exploited vagueness and ambiguity in order to accomplish what they consider to be their political tasks A substantial postscript to this edition traces some of the postmodernist perspectives to their origins in the works of particular individuals and to their history in the thought of twentieth century Europe Metascience and Politics attempts to address all these issues with brevity and seriousness of purpose in order to provide a defensible rationale for the scientific character of social and political studies It will be of interest to political scientists sociologists philosophers and intellectual historians A James Gregor is professor of political science at the University of California at Berkeley and an adjunct professor at Command and Staff College U S Marine Corps University at Quantico Virginia He has also been awarded the Order of Merit by the President of the Italian Republic for his contribution to Italy as a nation through his published works He is the author of Giovanni Gentile Philosopher of Fascism Interpretations of Fascism Phoenix Fascism in Our Time and Marxism China and Development all published by Transaction **Politics** Albert Venter, Alexander Johnston, 1991
