Metaphysical Causations:

The Metaphysics of the School: (pt.1) Book 5 [cont'd] Causes of being Thomas Harper, 1884 Causation and Its Basis in Fundamental Physics Douglas Kutach, 2013-10 This book is the first comprehensive attempt to solve what Hartry Field has called the central problem in the metaphysics of causation the problem of reconciling the need for causal notions in the special sciences with the limited role of causation in physics If the world evolves fundamentally according to laws of physics what place can be found for the causal regularities and principles identified by the special sciences Douglas Kutach answers this question by invoking a novel distinction between fundamental and derivative reality and a complementary conception of reduction He then constructs a framework that allows all causal regularities from the sciences to be rendered in terms of fundamental relations By drawing on a methodology that focuses on explaining the results of specially crafted experiments Kutach avoids the endless task of catering to pre theoretical judgments about causal scenarios This volume is a detailed case study that uses fundamental physics to elucidate causation but technicalities are eschewed so that a wide range of philosophers can profit The book is packed with innovations new models of events probability counterfactual dependence influence and determinism These lead to surprising implications for topics like Newcomb's paradox action at a distance Simpson's paradox and more Kutach explores the special connection between causation and time ultimately providing a never before presented explanation for the direction of causation Along the way readers will discover that events cause themselves that low barometer readings do cause thunderstorms after all and that we humans routinely affect the past more than we affect the future **Occasionalism and the Debate about Causation in Early Modern Germany** Christian Henkel, 2024-04-01 This is the first book to focus on occasionalism in early modern German philosophy It demonstrates that occasionalism provided a strong foundation for the thought of four important yet underexamined German philosophers Erhard Weigel Johann Christoph Sturm Christian Wolff and Gottfried Ploucquet Occasionalism is most often associated with Cartesian early modern Christian philosophers the most famous of whom is perhaps Nicolas Malebranche Early modern German occasionalism has received very little scholarly attention leaving us with an incomplete picture of the German causation debate from Leibniz to Kant This book combines a chronological investigation of four influential and historically connected cases of occasionalism in early modern Germany with a reconstruction of arguments to address specific problems in metaphysics natural philosophy philosophy of language and philosophy of psychology Providing a sufficient ground for nature and human beings mental and physical existence is a pressing issue for Weigel Sturm Wolff and Ploucquet In examining the thought of these four understudied German philosophers this book helps us rethink the relation between metaphysics of nature and science of nature and better understand the development of early modern debates about causation Occasionalism and the Debate about Causation in Early Modern Germany is an important resource for scholars and advanced students working on the history of early modern philosophy and the history of metaphysics and causation **The**

be settled before more specific problems e.g. the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing. This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field

When you light a match it is the striking of it which causes the lighting the presence of oxygen in the room is a background condition to the lighting. But in virtue of what is the striking a cause while the presence of oxygen is a background condition. When a fragile glass breaks it manifests a disposition to break when struck however not everything that breaks manifests this disposition. So under what conditions does something in breaking manifest fragility. After some therapy a man might stop being irascible and he might lose the disposition to become angry at the slightest provocation. If he does then he will have lost the disposition after an internal change. Can someone lose or gain a disposition merely as a result of a change in its external circumstances. Facts about the structure of society can it seem explain other facts. But how do they do it. Are there different kinds of structural explanations. Many things are said to be causes a rock when we say that the rock caused the window to break and an event when we say that the striking of the window caused its breakage. Which kind of causation causation by events or causation by things is more basic. In *Causation Explanation and the Metaphysics of Aspect* Bradford Skow defends answers to these questions. His answers rely on a pair of connected distinctions first is the distinction between acting or doing something and not acting second is the distinction between situations in which an event happens and situations in which instead something is in some state. The first distinction is used to draw the second an event happens if and only if something does something
