Banasik, 2026-03-15 More than 1 500 questions in a variety of formats including labeling, multiple choice, true false, fill in the blank, compare contrast and matching. Variety keeps the student engaged and the quantity of questions ensures students have opportunity for in depth practice sessions. Multiple case studies appear at the end of each unit with almost 50 case studies in all. Case studies will feature questions that help students develop clinical reasoning and judgment but because pathophysiology is used by more than undergraduate nursing students we will be careful about branding them as strictly NGN. Case studies help students practice application of concepts and develop critical thinking skills. Answer key is conveniently located in the back of the study guide.
