Moral Issues In International Affairs Problems Of European Integration:

Moral Issues in International Affairs Bill McSweeney, 2016-07-27 A number of eminent international scholars have come together in this volume to address the question of morality in international affairs and to explore some of the central normative issues which arise in the context of European integration The essays examine the general question of morality and address specific areas of concern in the proposals for further integration

Rethinking Ethical Foreign Policy David Chandler, Volker Heins, 2006-11-28 This new volume moves beyond the limits of current debate to show how today's foreign policy is increasingly about values rather than interests and why ethics are now playing a central role Rather than counterposing interests and ethics trying to find hidden agendas or emphasizing the double standards at play in ethical foreign policy this book brings together leading international theorists and a variety of stimulating approaches to develop a critical understanding of the rise of ethical foreign policy and to analyze the limits of ethical policy making on its own terms They deal with the limits of ethical foreign policy both in the light of the internal dynamic of these policies themselves and with regard to the often unintended consequences of policies designed to better the world This book also shows how the transformation of both the domestic and the international spheres of politics means that ethics has become a rallying point for non state actors and experts who gather around values and norms in order to force institutions to justify their behavior This process results from different structural changes and the transformation of the international system the individualization of Western societies and the growing importance of expertise in the justification of decisions in risk adverse societies It leads to a transformation of norms and to a redefinition of a global ethical framework that needs to be clarified This book will be of great interest to all students and researchers of foreign policy formation politics and international relations

The European Union and Europe's New Regionalism Boyka M. Stefanova, 2017-10-24 This book presents a new approach to studying the European Union's regional and global relevance It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project its enlargement neighborhood and mega regional policies The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward looking process of region building to an open selective system of global interactions

Ethics and Foreign Policy Karen E. Smith, Margot Light, 2001-09-13 Democratic citizenship possible MERVYN FROST

Values and Principles in European Union Foreign Policy Sonia Lucarelli, Ian Manners, 2006-08-21 This book presents a fresh examination of the values and principles that inform EU foreign policy exploring the implications of these values and principles on the construction of European Union identity today The authors show how current debates on European Union foreign policy and on European identity tend to be kept separated as if the process of identity formation had only an internal dimension or it was not related to the external behaviour of an international actor Conceiving EU foreign policy in its broadest context as a set of political actions that are regarded by external actors as EU actions the book focuses

on both Pillar I and Pillar II policies involving EU and member state actions and material political actions and less material ones such as speech acts Adopting a multidisciplinary perspective and drawing on political science political economy sociology environmental science and women s studies this book will be of great interest to students and scholars of European studies and politics *Debates on European Integration* Mette Sangiovanni, 2017-09-16 This is a major new reader that brings together and assesses the most influential scholarly contributions that have fashioned the debate on European integration over the past 50 years It includes an original contribution reflecting on key issues in integration theory by Ben Rosamond

The Social Construction of Europe Thomas Christiansen, Knud Erik Jørgensen, Antje Wiener, 2001-06-01 This book is the first to systematically introduce and apply a social constructivist perspective to the study of European integration Social constructivism is carefully located in terms of its philosophical and methodological origins The wider debates and contribution of constructivist approaches to international relations are reviewed and the insights that might then be afforded to European studies fully explored Highlights include new theoretical contributions to the debate by Ernst B Haas Andrew Moravcsik and Steve Smith research on key aspects of European integration and EU governance applying a variety of constructivist approaches The Social Construction of Europe provides new and important in Twentieth Century International Relations: Europe in the international system Michael Cox, 2006 *The Experiences of the 1995 Enlargement* Collegium Polonicum (Institution), 2003 Die Schriftenreihe Thematicon präsentiert Ergebnisse der interdisziplinären Forschung aus den Bereichen Kulturwissenschaft Recht Politologie Wirtschaftswissenschaften Umweltschutz und Raumordnung Einen besonderen Schwerpunkt bilden hier Probleme der Kommunikation zwischen Kulturen und sozialen Strukturen Das Collegium Polonicum eine grenzüberschreitende Einrichtung der Adam Mickiewicz Universität Poznań und der Europa Universität Viadrina Frankfurt Oder widmet sich in Forschung und Lehre dieser Problematik

The Politics of Unsustainability Ingolfur Blühdorn, Ian Welsh, 2008 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published
