Morphing Aerospace Vehicles And Structures:

Morphing Aerospace Vehicles and Structures John Valasek, 2012-02-24 Morphing Aerospace Vehicles and Structures provides a highly timely presentation of the state of the art future directions and technical requirements of morphing aircraft. Divided into three sections it addresses morphing aircraft bio inspiration and smart structures with specific focus on the flight control aerodynamics bio mechanics materials and structures of these vehicles as well as power requirements and the use of advanced piezo materials and smart actuators. The tutorial approach adopted by the contributors including underlying concepts and mathematical formulations unifies the methodologies and tools required to provide practicing engineers and applied researchers with the insight to synthesize morphing air vehicles and morphing structures as well as offering direction for future research.

Modeling the Effect of Damage in Composite Structures Christos Kassapoglou, 2015-05-06 Comprehensively covers new and existing methods for the design and analysis of composites structures with damage present. Provides efficient and accurate approaches for analysing structures with holes and impact damage. Introduces a new methodology for fatigue analysis of composites. Provides design guidelines and step by step descriptions of how to apply the methods along with evaluation of their accuracy and applicability. Includes problems and exercises. Accompanied by a website hosting lecture slides and solutions.

New Technologies and Developments in Unmanned Systems T. Hikmet Karakoc, Soledad Le Clainche, Xin Chen, Alper Dalkiran, Ali Haydar Ercan, 2023-10-17

Unmanned systems are one of the fastest growing and widely developing technologies in the world offering many possibilities for a variety of research fields. This book comprises the proceedings of the 2022 International Symposium on Unmanned Systems and the Defense Industry ISUDEF a multi disciplinary conference on a broad range of current research and issues in areas such as autonomous technology unmanned aircraft technologies avionics radar systems air defense aerospace robotics and mechatronics and aircraft technology design. ISUDEF allows researchers scientists engineers practitioners policymakers and students to exchange information present new technologies and developments and discuss future direction strategies and priorities in the field of autonomous vehicles and unmanned aircraft technologies.

Advances in Structural and Multidisciplinary Optimization Axel Schumacher, Thomas Vietor, Sierk Fiebig, Kai-Uwe Bletzinger, Kurt Maute, 2017-12-04 The

volume includes papers from the WSCMO conference in Braunschweig 2017 presenting research of all aspects of the optimal design of structures as well as multidisciplinary design optimization where the involved disciplines deal with the analysis of solids fluids or other field problems Also presented are practical applications of optimization methods and the corresponding software development in all branches of technology

Adaptronics - Smart Structures and Materials Johannes Michael Sinapius,2020-08-24 Since the 1980s scientists have been researching adaptive structures for materials for multifunctional elements or even for complete systems Adaptronics smart materials smart structures smart systems is a field of distinct interdisciplinarity The book therefore offers an interdisciplinary view of adaptronic systems materials and functional elements and their applications The subject matter integrates various engineering disciplines from electrical engineering and information technology to manufacturing and control engineering materials engineering and structural mechanics to name but a few of the relevant subject areas Starting from the basic principles and variants of adaptronic systems and functional materials the textbook explains the different construction methods of functional elements Building on this readers learn how to apply this knowledge to active shape control active vibration control and active vibroacoustics For each of these topics the author presents current examples from research discusses research results and future research questions Each of the nine chapters closes with references to further literature An index of the mathematical symbols used and a keyword index facilitate learning for readers The book is aimed at Master s students in engineering courses such as mechanical engineering aerospace engineering mechatronics automotive engineering and related courses The book provides a comprehensive overview for industrial practitioners who want to familiarize themselves with the field of adaptronics and also serves as a reliable reference book

Advanced Materials Ajit Behera,2021-11-21 This book provides a thorough introduction to the essential topics in modern materials science It brings together the spectrum of materials science topics spanning inorganic and organic materials nanomaterials biomaterials and alloys within a single cohesive and comprehensive resource Synthesis and processing techniques structural and crystallographic configurations properties classifications process mechanisms applications and related numerical problems are discussed in each chapter End of chapter summaries and problems are included to deepen and reinforce the reader s comprehension Provides a cohesive and comprehensive reference on a wide range of materials and processes in modern materials science Presents material in an engaging manner to encourage innovative practices and perspectives Includes chapter summaries and problems at the end of every chapter for reinforcement of concepts
