M. W. Berkowitz, F. Oser, 2013-10-28. First published in 1985. Kohlberg and his colleagues claimed that all one need do in moral education is change the stage or structure of an individual's moral reasoning and changes in moral behavior, ego, and personality style would occur. As moral education entered the 1980s many important problems remained. The question of the legitimacy of the highest stage is still being considered. The problem of the relationship between judgment and action is receiving much attention and reformulation as well. The role of affect in moral functioning has been sorely overlooked until very recently. A further issue is the implication of the particular realm of one's life: family, school, peer group, workplace, church, for the form and effectiveness of moral education. Finally, how can self-acknowledged moral transgressions in typical individuals be incorporated into the theory? This volume reflects these problems. **Handbook of Moral Behavior and Development: Theory**. William M. Kurtines, Jacob L. Gewirtz, 1991. First Published in 1991. Theory of College Student Development. Naijian Zhang, Phyllis McCluskey-Titus, Tony W. Cawthon, 2022-07-25. The purpose of *Theory of College Student Development* is to provide readers with new theoretical knowledge or a reminder of the foundational and evolving theories that professionals can utilize for understanding and making sense of students' behavior. Its primary focus is on the integration of knowledge, skills, and application of such theories in such a way as to emphasize utility and application. A unique component is its emphasis on professional competence, professional identity, and theoretical application. Unlike previously published case study books designed to teach student development theory, this text utilizes a single case that allows readers to see how a range of theories are applicable to this one case. Theories presented for application include both foundational and evolving theoretical perspectives. The twelve chapters have been written by both faculty and practitioners. Each coeditor and chapter author brings unique perspectives and a lens of viewing theory and application representing their experiences, talents, and expertise. It features authors who represent the best of the best and

these authors challenged us to be more innovative as we reimagine the evolution of student development theory. The editors had two specific audiences in mind: faculty and higher education practitioners. With over two hundred graduate preparation programs in the United States, most offering a student development theory course, this book will help graduate faculty both new and seasoned with a mechanism for teaching theory in a fun, relevant, and innovative way.

Developmental Theory and Its Application in Guidance Programs G. Dean Miller, 1977.

Ethics and Economic Affairs Alan Lewis, Karl-Erik Wärneryd, 2002-01-08. There has been a remarkable growth of interest in the ethical dimension of economic affairs. Whilst the interest in business ethics has been long standing, it has been given renewed emphasis by high-profile scandals in the world of business and finance. At the same time, many economists dissatisfied with the discipline's emphasis on self-interest and individualism and by the asocial nature of much economic theory have sought to enlarge the scope of economics by looking at ethical questions. In this volume, a group of interdisciplinary scholars provide contributions which include evaluations of work in business ethics, empirical studies of such issues as social and ethical investing, the place of ethics in the new economics, and perspectives from other disciplines.

Stage Theories of Cognitive and Moral Development, 1978. **Moral Development Theories -- Secular and Religious** R. Murray Thomas, 1997-03-25. Moral Development Theories: Secular and Religious introduces readers to 13 secular models and 13 religious theories in a wide-ranging comparative study of the roots of moral development. The secular models include attribution theory, cognitive structural views, social learning, and social cognition approaches. Freud's psychoanalysis plus Erikson and Fromm's Marxist beliefs, a composite theory, Hoffman's conception of empathy, Anderson's information integration view, Gilligan's gender distinction, Sutherland and Cressey's explanation of delinquency, and Lovinger's ego development. Religious theories represent the Judaic, Christian, Islamic, Hinduism, and derivatives: Buddhism, Jainism, Sikhism, Confucianism, Shinto, and four minor theories drawn from the belief systems of the Navajo, Zulus, Vodou adherents, and Okinawans. The description of each theory is designed to answer a common set of questions introduced in Chapter 1. The closing section of each chapter evaluates that chapter's theories in terms of a series of assessment standards described in Chapter 2. The book's final chapter inspects all of the theories from the viewpoint of five desires that people often hold in relation to their conceptions of moral development. The desires are: a) for immanent justice, b) to understand the causes of the consequences that result from people's behavior in moral situations, c) to become immortal, d) to enjoy a happy life, and e) to understand the moral development process in order to help others who need moral guidance.
