Book Description Computer vision has

been revolutionizing a wide range of industries and OpenCV is the most widely chosen tool for computer vision with its ability to work in multiple programming languages. Nowadays in computer vision there is a need to process large images in real time which is difficult to handle for OpenCV on its own. This is where CUDA comes into the picture allowing OpenCV to leverage powerful NVIDIA GPUs. This book provides a detailed overview of integrating OpenCV with CUDA for practical applications. To start with you'll understand GPU programming with CUDA, an essential aspect for computer vision developers who have never worked with GPUs. You'll then move on to exploring OpenCV acceleration with GPUs and CUDA by walking through some practical examples. Once you have got to grips with the core concepts you'll familiarize yourself with deploying OpenCV applications on NVIDIA Jetson TX1 which is popular for computer vision and deep learning applications. The last chapters of the book explain PyCUDA, a Python library that leverages the power of CUDA and GPUs for accelerations and can be used by computer vision developers who use OpenCV with Python. By the end of this book you'll have enhanced computer vision applications with the help of this book's hands-on approach. What you will learn:

- Understand how to access GPU device properties and capabilities from CUDA programs.
- Learn how to accelerate searching and sorting algorithms.
- Detect shapes such as lines and circles in images.
- Explore object tracking and detection with algorithms.
- Process videos using different video analysis techniques in Jetson TX1.
- Access GPU device properties from the PyCUDA program.
- Understand how kernel execution works.

Who this book is for: This book is a go-to guide for you if you are a developer working with OpenCV and want to learn how to process more complex image data by exploiting GPU processing. A thorough understanding of computer vision concepts and programming languages such as C or Python is expected.
