Russell, Philip Moore, 2020-01-14 This book presents the latest research on mechatronic systems engineering By bringing together the most important papers from the 2018 Mechatronics Forum Conference Reinventing Mechatronics it outlines key

trends in research and applications that will define mechatronics for the next 50 years Mechatronics was established as an engineering discipline over 50 years ago as the integration of electronics and information technology with mechanical design Given major technological advances and the growth of systems level concepts such as Cyber Physical Systems and the

Internet of Things along with Cloud Technologies and Big Data it's now high time to reconsider the role of mechatronics

particularly within engineering design Past and ongoing technological changes are impacting how systems are designed and configured in ways that could never have been envisaged when the field of mechatronics was first introduced

The first two ICoRSE editions brought together professors, Ph.D. students, and researchers in Europe, North America, and Asia in countries such as England, Albania, Austria, Bulgaria, Canada, Czech Republic, Germany, France, Italy, Portugal, Turkey, Ukraine, Uzbekistan, and Vietnam. In this year's edition of the conference, we have benefitted from the inclusion in the scientific committee of the conference of professors in all of these countries and we cover a wide variety of topics such as theoretical and applied mechanics, cyber physical systems, robotics, smart bio-medical and bio-mechatronic systems, new and intelligent materials and structures, modelling and simulation in mechanics and mechatronics, smart mechatronic production and control system, optics control systems, big data modelling, micro and nanotechnology, automation, manufacturing optimization, and other. Since the book's chapters represent contributions of scholars who work in both state funded institutions and in the business environment, they reflect a clear picture of the novelties attained in the leading edge sciences that are in the scope of the conference. It is our belief that the book is useful to both students and researchers in all areas of engineering who will each find at least one topic worthy of their interest in this work Future Intelligent Information Systems Dehuai Zheng, 2011-04-06 2010 First International Conference on Electrical and Electronics Engineering was held in Wuhan, China.
