Media Convergence Michael Latzer, 2017 Convergence is an ambiguous term used by various disciplines to describe and analyze processes of change toward uniformity or union Its application in the communications sector often referred to as media convergence also encompasses valuable approaches and insights to describe characterize and understand the digital creative economy A certain amount of fuzziness combined with the broad multipurpose character of convergence leads both to a general and a wide range of very specific understandings of the convergent communications sector This sector substantially overlaps with the digital creative economy which is also characterized by a degree of vagueness Common sub sectors and subjects between

communications and digital creative industries such as broadcasting publishing advertising music film and games are even growing because of convergence Beyond that the consequences of media convergence are also discussed for other parts of creative industries such as museums libraries and design in particular New digital media technology and services are considered as central drivers of creative industries Altogether this makes studies of media convergence both its approaches and results highly relevant for the understanding of the digital creative economy

Regulation, Governance and Convergence in the Media Peter Humphreys,Seamus Simpson,2018-08-31 Media convergence is often propounded as inevitable and ongoing Yet much of the governance of the media sector s key parts has developed along discrete evolutionary paths mostly incremental in character This volume breaks new ground through exploring a diverse range of topics at the heart of the media convergence governance debate such as next generation networks spectrum copyright and media subsidies It shows how reluctance to accommodate non market based policy solutions creates conflicts and problems resulting in only shallow media convergence thus far

Convergence and/or divergence Nina Ratavaara,2011-09-21 Essay from the year 2008 in the subject Communications Multimedia Internet New Technologies grade 3 vgl Anm University of Helsinki Communications course Media Convergence language English abstract It is not possible to avoid the two words convergence divergence in literature discussions and theories about new media new services what the audience wants and the future of media nowadays as convergence rapidly became one of the key concepts in new media discourse Storsul Stuedahl 2007 9 So it was mentioned in articles academic texts policy documents and industrial papers and was introduced as the new order Fagerjord Storsul 2007 19 And in becoming a key concept convergence also became an important rhetorical tool that encouraged change in several fields e g grassroot journalism sites or media companies presenting new future plans for online platforms and mobile services Storsul Stuedahl 2007 9 But even if the two words are omnipresent it seems as if not everybody is writing meaning and talking about the same Actually sometime when reading different articles and books it seems as the authors were writing and discussing totally different topics Like Storsul and Stuedahl describe it convergence really is a buzzword Storsul Stuedahl 2007 9 And it is not only a buzzword but it bears the old human science fiction visions and hopes of media enabling things being managed by one central system and or device that organizes our whole life and we now can t even think of Storsul Stuedahl 2007 10 One very common though simple example of such futuristic thinking and visions might be the refrigerator that automatically and independently orders the needed food and drinks from the shop and they are also delivered automatically maybe even beamed into the refrigerator
