Characterization and Failure Analysis of Plastics ASM International,Steve Lampman,2003-01-01 The selection and application of engineered materials is an integrated process that requires an understanding of the interaction between materials properties manufacturing characteristics design considerations and the total life cycle of the product This reference book on engineering plastics provides practical and comprehensive coverage on how the performance of plastics is characterized during design property testing and failure analysis The fundamental structure and properties of plastics are reviewed for general reference and detailed articles describe the important design factors properties and failure mechanisms of plastics The effects of composition processing and structure are detailed in articles on the physical chemical thermal and mechanical properties Other articles cover failure mechanisms such as crazing and fracture impact loading fatigue failure wear failures moisture related failure organic chemical related failure photolytic degradation and microbial degradation Characterization of plastics in failure analysis is described with additional articles on analysis of structure surface analysis and fractography **Engineering Materials** Kenneth G. Budinski,Michael K. Budinski,1999 Presents updated chapters and enhanced discussions in its coverage of the most recent developments of engineering materials The text also blends material on composites with coverage of plastics manufacturing processes **Materials Science and Engineering** William D. Callister,1997 In this introduction to materials science and engineering William Callister provides a treatment of the important properties of three types of materials metals ceramics and polymers *ASM Handbook* ASM International. Handbook Committee,1997-12 This volume is a comprehensive reference on the basic concepts methodologies and information sources dealing with materials selection and its integration with engineering design processes Contents include contributions from 100 experts involved with design materials selection and manufacturing Addresses metals ceramics polymers and composites and provides many case histories and examples **Bibliographic Index** ,2004 *Engineered Materials Handbook* Theodore J.
