Parametric Programming for Computer Numerical Control Machine Tools and Touch Probes Mike Lynch, 1997

Until now parametric programming has been the best kept secret of CNC. This new book demystifies this simple yet sophisticated programming tool in an easy to understand tutorial format and presents a comprehensive how-to of parametric programming from a user's point of view. Focusing on three of the most popular versions of parametric programming: Fanuc's custom macro B, Okuma's user task 2 and Fadal's macro, the book describes what parametric programming is, what it can do and how it does it more efficiently than manual programming. Along with a host of program simplifying techniques included in the book, you're treated to descriptions of how to write, set up and run general subprograms, simulate the addition of control options and integrate higher level programming capabilities at G code level.

Flexible Automation in Japan J. Hartley, 2013-04-09. Much has been said and written about Japan's manufacturing prowess. Most of the comment comes from people who are merely visitors to the country and can be best classified as observers looking in from the outside. Other views come from the Japanese themselves in which the double barrier of culture and language filters out much information that would be of real value to Western industrialists. Neither of these limitations apply to John Hartley who has been resident in Japan for the past five years. He understands the culture, can speak the language and has extensive contacts at the highest level. Therefore he is in a unique position to report on the Japanese scene and its activities in advanced manufacturing technology. This he has been doing on a regular basis to IFS magazines The Industrial Robot Assembly Sensor Review and The FMS Magazine. Most of the material in this book is from John Hartley's pen and represents his most significant contributions on flexible automation in Japan to these

journals over the last three years It is augmented with a few other articles written by leading authorities on new technology in Japanese manufacturing industry **Manufacturing Engineering** ,2009 **Government Reports Annual Index** ,1984 House documents ,1897 *The Japan Daily Mail* ,1888 **Papers relating to the foreign relations of the United States** ,1897 *Chilton's Iron Age* ,1982
