**Climate Change and Vulnerability and Adaptation** Neil Leary, 2013-07-04 Sound and solid case studies on vulnerability and adaptation have been woefully lacking in the international discourse on climate change This set of books begins to bridge the gap Achim Steiner UN Under Secretary General and Executive Director of United Nations Environment Programme Important reading for students and practitioners alike Martin Parry Co Chair Working Group II Impacts Adaptation and Vulnerability Intergovernmental Panel on Climate Change IPCC Fills an important gap in our understanding It is policy relevant and deserves to be widely read Richard Klein Senior Research Fellow Stockholm Environment Institute SEI Sweden The Intergovernmental Panel on Climate Change IPCC concluded in its 2001 report that much of the developing world is highly vulnerable to adverse impacts from climate change But the IPCC also concluded that the vulnerabilities of developing countries are too little studied and too poorly understood to enable determination of adaptation strategies that would be effective at reducing risks These authoritative volumes resulting from the work of the Assessments of Impacts and Adaptations to Climate Change AIACC project launched by the IPCC in 2002 are the first to

provide a comprehensive investigation of the issues at stake Climate Change and Vulnerability discusses who is vulnerable to climate change the nature of their vulnerability and the causes of their vulnerability for parts of the world that have been poorly researched until now Climate Change and Adaptation covers current practices for managing climate risks to food security water resources livelihoods human health and infrastructure needs for effective management of climate risks the changing nature of the risks strategies for adaptation and the need to integrate these strategies into development planning and resource management *Transformative Change and Real Utopias in Early Childhood Education* Peter

Moss,2014-04-24 Early childhood education and care is a major policy issue for national governments and international organisations This book contests two stories both infused by neoliberal thinking that dominate early childhood policy making today the story of quality and high returns and the story of markets stories that promise high returns on investment if only the right technologies are applied to children and the perfection of a system based on competition and individual choice But there are alternative stories and this book tells one a story of democracy experimentation and potentiality in which early childhood centres are public spaces and public resources places where democracy and experimentation are fundamental values community workshops for realising the potentiality of citizens This story calls for transformative change but offers a real utopia both viable and achievable The book discusses some of the conditions needed for the story's enactment and shows what it means in practice in a chapter about project work contributed by a Swedish preschool teacher Critical but hopeful this book is an important contribution to resisting the dictatorship of no alternative and renewing a democratic politics of early childhood education It is essential reading for students and teachers researchers and other academics and for all other concerned citizens
