the money recruited the faculty and attracted the students that made it a great meritocratic institution America's university. The authors provide the fullest account yet of this transformation and of the wrenching campus crisis of the late sixties. During the last thirty years of the twentieth century a new academic culture arose: meritocratic Harvard morphed into worldly Harvard. During the presidencies of Derek Bok and Neil Rudenstine the university opened its doors to growing numbers of foreign students, women, African and Asian Americans, and Hispanics. Its administration, faculty, and students became more deeply engaged in social issues; its scientists and professional schools were more ready to enter into shared commercial ventures. But worldliness brought its own conflicts over affirmative action and political correctness, over commercialization, over the ever higher costs of higher education. This fascinating account, the first comprehensive history of a modern American university, is essential reading for anyone with an interest in the present state and future course of higher education.
