 important than at any other time in human history Yet much of the emphasis in schooling has been on reading and after the  
 early years writing skills have been given less attention Internationally too many children are leaving school without the  
 writing skills they need to succeed in life The evidence indicates that students rarely develop proficiency as writers without  
 effective teacher instruction Teaching Writing offers a comprehensive approach for the middle years of schooling when the  
 groundwork should be laid for the demanding writing tasks of senior school and the workplace Teaching Writing outlines  
 evidence based principles of writing instruction for upper primary students and young adolescents It presents strategies that  
 are ready for adoption or adaptation and exemplars to assist with designing and implementing writing lessons across the  
 middle years of school It addresses writing from a multimodal perspective while also highlighting the importance of teaching  
 linguistic aspects of text design such as sentence structure vocabulary and spelling as foundations for meaning making  
 Contributors argue that students need to continue to develop their skills in both handwriting and keyboarding Examples of  
 the teaching of writing across disciplines are presented through a range of vignettes Strategies for assessing student writing  
 and for supporting students with diverse needs are also explored With contributions from leading literacy educators Teaching
