Reconstruction by Space Carving using Graphics Hardware Christian Nitschke,2012-03-02 Diploma Thesis from the year 2006 in the subject Communications Research Studies Enquiries grade 1 University of Weimar language English

abstract Reconstruction of real world scenes from a set of multiple images is a topic in Computer Vision and 3D Computer Graphics with many interesting applications There exists a powerful algorithm for shape reconstruction from arbitrary viewpoints called Space Carving However it is computationally expensive and hence can not be used with applications in the field of 3D video or CSCW as well as interactive 3D model creation Attempts have been made to achieve real time framerates using PC cluster systems While these provide enough performance they are also expensive and less flexible Approaches that use GPU hardware acceleration on single workstations achieve interactive framerates for novel view synthesis but do not provide an explicit volumetric representation of the whole scene The proposed approach shows the efforts in developing a GPU hardware accelerated framework for obtaining the volumetric photo hull of a dynamic 3D scene as seen from multiple calibrated cameras High performance is achieved by employing a shape from silhouette technique in advance to obtain a tight initial volume for Space Carving Also several speed up techniques are presented to increase efficiency Since the entire processing is done on a single PC the framework can be applied to mobile setups enabling a wide range of further applications The approach is explained using programmable vertex and fragment processors with current hardware and compared to highly optimized CPU implementations It is shown that the new approach can outperform the latter by more than one magnitude The downloadable introduction has been written specifically for this offer Its contents are only a subset of the real introductory chapter of the thesis Standard and Poor's 500 Guide, 2012 Edition Standard & Poor's, 2011-12-16 The most accurate up to date market intelligence for superior investment decisions from the world's premier financial index The Standard Poor's 500 Index is the most watched index in America if not the world Whether you're an individual investor purchasing stocks an executive researching corporate competitors or a job seeker looking for concise and up to the minute overviews of potential employers you'll find the critical often hard to find information you need in Standard Poor's 500 Guide 2012 Edition Easy to use and packed with market intelligence on all 500 companies listed in the S P 500 Index this authoritative reference includes Information on the bluest of blue chip stocks from Abbott Labs and GE to Microsoft and Yahoo Summaries of each company's business activity sales history and recent developments Earnings and dividends data with four year price charts Exclusive Standard Poor's Quality Rankings from A to D New introduction by David M Blitzer Ph D Managing Director and Chairman of the Index Committee Standard Poor's In addition you get unique at a glance details about Stocks with A Quality Rankings Companies with five consecutive years of earnings increases a key indicator of strong long term performance Per share data income statement analyses and balance sheet overviews of each company covered Put the comprehensive updated data and analysis expertise of the world's premier securities information firm at your fingertips with Standard Poor's 500 Guide 2012 Edition Standard and Poors 500 Guide 2013 Standard & Poor's, 2012-12-21 The most up to date and accurate market intelligence for superior investment decisions from the world's premier financial index Standard Poor's 500 Guide 2013 Edition contains hard to find data and analysis on the bluest of blue chip stocks from Abbot
