*Recognizing and Correcting Developing Malocclusions: A Problem Oriented Approach to Orthodontics* provides an evidence based approach to early treatment, an often controversial topic. Based on decades of experience in clinical practice and education, Drs Araújo and Buschang clearly present treatment protocols for mixed dentition patients with various malocclusions and other orthodontic problems. Class I, Class II, and Class III malocclusions are covered extensively, along with eruptive deviations and open bite malocclusions. The literature is comprehensively reviewed to ensure that the reader thoroughly understands the development, phenotypic characteristics, and etiology of each type of malocclusion. Taking a problem oriented approach, the authors provide detailed information for each case, develop comprehensive problem lists, and then provide evidence based treatment solutions. The clinical focus of the text is ideal suited for private practice clinician, with numerous references and academic underpinnings to ensure its suitability for orthodontic and pediatric dentistry residents. Focuses solely on mixed dentition orthodontic treatments. Great variety of case studies (5 to 10 cases per chapter). Each case is presented in the format of a problem list and evidence based solutions. More than 300 clinical photographs and radiographs.
