### **Why Are**

**Our Pictures Puzzles?** James Elkins,2004-11-23 With bracing clarity James Elkins explores why images are taken to be more intricate and hard to describe in the twentieth century than they had been in any previous century Why Are Our Pictures Puzzles uses three models to understand the kinds of complex meaning that pictures are thought to possess the affinity between the meanings of paintings and jigsaw puzzles the contemporary interest in ambiguity and levels of meaning and the penchant many have to interpret pictures by finding images hidden within them Elkins explores a wide variety of examples from the figures hidden in Renaissance paintings to Salvador Dali s paranoiac meditations on Millet s Angelus from Persian miniature paintings to jigsaw puzzles He also examines some of the most vexed works in history including Watteau s meaningless paintings Michelangelo s Sistine Ceiling and Leonardo s Last Supper

Gesualdo M Zucco, Benoist Schaal,Mats Olsson,Ilona

Croy,2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose

might be able to discriminate somewhere in the order of 10 000 different odourants The recent finding that the human nose

can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated

the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for

anyone who should hold the view that olfaction is unimportant in human affairs The papers presented in this ebook carefully

collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large number of quite different

reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here

cover a broad range of topics which illustrate contemporary interests in our field. Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed. These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics. These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook. In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary problems to which the study of olfaction is now contributing. A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives. The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly mother infant bonding and the emotions that different odourants can evoke. This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction. The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures. Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine. I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it.
