ECCWS 2023 22nd European Conference on Cyber Warfare and Security Antonios Andreatos, Christos Douligeris, 2023-06-22 *The Law Student's Helper*, 1893 *InsurTech: A Legal and Regulatory View* Pierpaolo Marano, Kyriaki Noussia, 2019-12-05 This Volume of the AIDA Europe Research Series on Insurance Law and Regulation explores the key trends in InsurTech and the potential legal and regulatory issues that accompany them There is a

proliferation of ideas and concepts within InsurTech that will fundamentally change the market in the next few years. These innovations have the potential to change the way the insurance industry works and alter the relationships between customers and insurers, resulting in insurance products that are more closely aligned to individual preferences and priced more appropriately to the risk. Increasing use of technology in the insurance sector is having both a disruptive and transformative impact on areas including product development, distribution, modelling, underwriting, and claims and administration practice. The result is a new industry known as InsurTech. But while the insurance market looks to technology for greater efficiency, regulators are beginning to raise concerns about managing potential risks. The first part of the book examines technological innovations relevant for insurance, such as FinTech, InsurTech, Sharing Economy, and the Internet of Things. The second part then gathers contributions on insurance contract law in a digitalized world, while the third part focuses on cyber insurance and robots. Last but not least, the fourth part of the book discusses legal and ethical questions regarding autonomous vehicles and transportation, including the shipping industry, as well as their impact on the insurance sector and civil liability. Written by legal scholars and practitioners, the book offers international, comparative, and European perspectives. The chapters 'FinTech, InsurTech, and the Regulators' by Viktoria Chatzara, 'Smart Contracts in Insurance: A Law and Futurology Perspective' by Angelo Borselli, and 'Room for Compulsory Product Liability Insurance in the European Union for Smart Robots' by Aysegül Bugra are available open access under a CC BY 4.0 license at link.springer.com. The Insider's Guide to Law Firms, 2000 **Future Law** Edwards, Lilian Edwards, 2020-03-02. How will law regulation and ethics govern a future of fast-changing technologies? Bringing together cutting-edge authors from academia, legal practice, and the technology industry, *Future Law* explores and leverages the power of human imagination in understanding, critiquing, and improving the legal responses to technological change. It focuses on the practical difficulties of applying law, policy, and ethical structures to emergent technologies both now and in the future. It covers crucial current issues such as big data, ethics, ubiquitous surveillance, and the Internet of Things, and disruptive technologies such as autonomous vehicles, DIY genetics, and robot agents. By using examples from popular culture such as books, films, TV, and Instagram, including *Black Mirror*, *Disney Princesses*, *Star Wars*, *Doctor Who*, and *Rick and Morty*, it brings hypothetical examples to life. And it asks where law might go next and to regulate new phase technology such as artificial intelligence, smart homes, and automated emotion recognition.
